# KILAS BALIK PEREKONOMIAN INDONESIA 2024

## Indonesian Economy in 2024

Kinerja perekonomian Indonesia tetap solid dan lebih baik dibandingkan beberapa negara maju dan berkembang lainnya di tengah ketidakpastian global. Pertumbuhan ekonomi Indonesia tumbuh 5,02 persen (y-on-y) pada triwulan IV 2024 dibandingkan triwulan IV 2023 dan lebih tinggi dibandingkan negara peers seperti Singapura (4,3%), Arab Saudi (4,4%), dan Malaysia (4,8%). Pada sisi produksi, komponen Administrasi Publik dan Pertahanan, Jaminan Sosial Wajib mengalami pertumbuhan tertinggi yaitu 16,63 persen. Sementara pada sisi pengeluaran, komponen Pengeluaran Konsumsi Final Pemerintah Umum (PPH) mencatat pertumbuhan tertinggi yaitu 38,58 persen.

Indonesia's economic performance remains solid and better than several other developed and developing countries amid global uncertainty. Indonesia's economic growth increased by 5.02 percent (y-on-y) in the fourth quarter of 2024, compared to the fourth quarter of 2023 and higher than peer countries such as Singapore (4.3%), Saudi Arabia (4.4%), and Malaysia (4.8%). On the production side, Public Administration and Defense, Compulsory Social Security experienced the highest growth at 16.63 percent. Meanwhile on the expenditure side, General Government Final Consumption Expenditure (GGFCE) component recorded the highest growth, increased by 38.58 percent.

Pertumbuhan tertinggi pada sisi produksi adalah Komponen Kegiatan Jasa Lainnya yaitu 11,36 persen. Sementara pada sisi pengeluaran, komponen Ekspor Barang dan Jasa mengalami pertumbuhan tertinggi yaitu 7,63 persen.

The highest growth on the production side was Other Services Activities at 11.36 percent. Meanwhile on the expenditure side, Exports of Goods and Services component experienced the highest growth at 7.63 percent.

Selama tahun 2024, kelompok provinsi di Pulau Jawa masih menonjolkan struktur spasial perekonomian Indonesia dengan kontribusi sebesar 57,02 persen, diikuti oleh Pulau Sumatera sebesar 22,12 persen, Pulau Kalimantan sebesar 8,24 persen, Pulau Sulawesi sebesar 7,12 persen, Pulau Bali dan Nusa Tenggara sebesar 2,81 persen, serta Pulau Maluku dan Papua sebesar 2,69 persen.

During 2024, the group of provinces in Java Island still emphasized the spatial structure of the Indonesian economy with a contribution of 57.02 percent, followed by Sumatera Island at 22.12 percent, Kalimantan Island by 8.24 percent, Sulawesi Island by 7.12 percent, Bali and Nusa Tenggara Islands by 2.81 percent, and Maluku and Papua Islands by 2.69 percent.

Stabilitas perekonomian tersebut juga didukung oleh upaya Pemerintah dalam menjaga inflasi tetap rendah dan terkendali, laju inflasi pada bulan Desember 2024 sebesar 1,57 persen (yoy), dengan Indeks Harga Konsumen (IHK) sebesar 106,80 atau berada dalam kisaran sasarannya sebesar  $2,5 \pm 1\%$ . Terkendalinya inflasi dan PMI yang ekspansif menunjukkan pelaku usaha tetap optimis terhadap kondisi perekonomian nasional ke depan. Kondisi ini juga mencerminkan prospek positif bagi sektor manufaktur, dengan banyak perusahaan bersiap menghadapi peningkatan permintaan pada tahun 2025.

Pemerintah Indonesia telah menetapkan target pertumbuhan ekonomi sebesar 5,2% untuk tahun 2025, sejalan dengan tujuannya pada tahun 2024, sebagaimana didukung oleh Undang-Undang Anggaran Pendapatan dan Belanja Negara 2025 (UU APBN 2025). Organisasi internasional menawarkan proyeksi serupa, dengan IMF dan Bank Dunia memperkirakan pertumbuhan sebesar 5,1% dan OECD dan UNCTAD sama-sama memperkirakan 5,2%.

Ketidakpastian global, termasuk ketegangan geopolitik, kebijakan ekonomi AS, dan perlambatan ekonomi Tiongkok, menimbulkan risiko yang signifikan. Penguatan dolar AS telah meningkatkan biaya impor, sementara potensi perang dagang dapat mengganggu pasar ekspor utama.

Ketergantungan Indonesia pada Tiongkok dan AS sebagai mitra dagang utama menggarisbawahi kerentanannya. Dengan 30% ekspor ditujukan ke Tiongkok dan 10% ke AS, gangguan di pasar-pasar ini dapat meredam pertumbuhan Indonesia. Namun, diversifikasi strategis dan peningkatan kemandirian dalam produksi dapat mengurangi risiko ini.

Prospek ekonomi Indonesia untuk tahun 2025 mencerminkan keseimbangan yang sensitif antara ketahanan dan ambisi. Sementara tekanan eksternal menimbulkan tantangan, fokus strategis negara pada konsumsi domestik, investasi dalam inovasi, dan transisi energi terbarukan menyediakan jalur menuju pertumbuhan yang stabil. Dengan reformasi yang berkelanjutan dan kepemimpinan yang kuat, Indonesia seharusnya mampu mengatasi tantangan global, sambil memanfaatkan peluang yang muncul.

*The economic stability was also supported by the Government's efforts to keep inflation low and under control, inflation rate in December 2024 was 1.57 percent (yoy), with a Consumer Price Index (CPI) of 106.80 or remained within the target range of  $2.5 \pm 1\%$ . Controlled inflation and expansive PMI show that the businesses remain optimistic about future national economic conditions. This condition also reflects the positive prospects for the manufacturing sector, with many companies preparing to face increased demand in 2025.*

*The Indonesian government has set an economic growth target of 5.2% for 2025, in line with its 2024 goal, as supported by the 2025 State Budget Law (UU APBN 2025). International organizations offer similar projections, with the IMF and World Bank estimating growth at 5.1% and the OECD and UNCTAD both forecasting 5.2%.*

*Global uncertainties, including geopolitical tensions, U.S. economic policies, and China's economic slowdown, pose significant risks. The strengthening U.S. dollar has already increased import costs, while potential trade wars could disrupt key export markets.*

*Indonesia's reliance on China and the U.S. as major trading partners underscores its vulnerability. With 30% of exports destined for China and 10% for the U.S., disruptions in these markets could dampen Indonesia's growth. However, strategic diversification and increased self-reliance in production may mitigate these risks.*

*Indonesia's economic outlook for 2025 reflects a sensitive balance between resilience and ambition. While external pressures pose challenges, the country's strategic focus on domestic consumption, investment in innovation, and renewable energy transition provides a pathway for stable growth. With continued reform and strong leadership, Indonesia should be able to weather global headwinds, while capitalizing on emerging opportunities.*

# 2025 ECONOMY OUTLOOK

## Prospek Ekonomi Tahun 2025

**Pertumbuhan di jalur yang berbeda di tengah ketidakpastian kebijakan yang meningkat**  
*Growth on divergent paths amid elevated policy uncertainty*

Pertumbuhan global diproyeksikan sebesar 3,3 persen baik pada tahun 2025 maupun 2026, di bawah rata-rata historis (2000–19) sebesar 3,7 persen. Prakiraan untuk tahun 2025 secara umum tidak berubah dari yang ada dalam Prospek Ekonomi Dunia (WEO) Oktober 2024, terutama karena revisi ke atas di Amerika Serikat yang mengimbangi revisi ke bawah di negara-negara ekonomi utama lainnya. Inflasi utama global diperkirakan akan turun menjadi 4,2 persen pada tahun 2025 dan menjadi 3,5 persen pada tahun 2026, kembali ke target lebih awal di negara-negara maju daripada di negara-negara pasar berkembang dan negara-negara berkembang.

Risiko jangka menengah terhadap proyeksi dasar cenderung mengarah ke bawah, sementara prospek jangka pendek ditandai oleh risiko yang beragam. Risiko positif dapat mengangkat pertumbuhan yang sudah kuat di Amerika Serikat dalam jangka pendek, sedangkan risiko di negara-negara lain berada pada sisi negatif di tengah ketidakpastian kebijakan yang meningkat. Gangguan yang ditimbulkan oleh kebijakan terhadap proses disinflasi yang sedang berlangsung dapat mengganggu poros menuju pelonggaran kebijakan moneter, dengan implikasi bagi keberlanjutan fiskal dan stabilitas keuangan. Mengelola risiko ini memerlukan fokus kebijakan yang tajam untuk menyeimbangkan trade-off antara inflasi dan aktivitas riil, membangun kembali penyangga, dan mengangkat prospek pertumbuhan jangka menengah melalui peningkatan reformasi struktural serta aturan dan kerja sama multilateral yang lebih kuat.

*Global growth is projected at 3.3 percent both in 2025 and 2026, below the historical (2000–19) average of 3.7 percent. The forecast for 2025 is broadly unchanged from that in the October 2024 World Economic Outlook (WEO), primarily on account of an upward revision in the United States offsetting downward revisions in other major economies. Global headline inflation is expected to decline to 4.2 percent in 2025 and to 3.5 percent in 2026, converging back to target earlier in advanced economies than in emerging market and developing economies.*

*Medium-term risks to the baseline are tilted to the downside, while the near-term outlook is characterized by divergent risks. Upside risks could lift already-robust growth in the United States in the short run, whereas risks in other countries are on the downside amid elevated policy uncertainty. Policy-generated disruptions to the ongoing disinflation process could interrupt the pivot to easing monetary policy, with implications for fiscal sustainability and financial stability. Managing these risks requires a keen policy focus on balancing trade-offs between inflation and real activity, rebuilding buffers, and lifting medium-term growth prospects through stepped-up structural reforms as well as stronger multilateral rules and cooperation.*

Pertumbuhan global diperkirakan akan tetap stabil, pada 3,3 persen pada tahun 2025 dan 2026, perkiraan pertumbuhan berada di bawah rata-rata historis (2000–19) sebesar 3,7 persen dan secara umum tidak berubah dari Oktober. Namun, gambaran keseluruhan menyembunyikan jalur yang berbeda di seluruh ekonomi dan profil pertumbuhan global yang genting.

Di antara negara-negara maju, revisi perkiraan pertumbuhan berjalan ke arah yang berbeda. Di Amerika Serikat, permintaan yang mendasarinya tetap kuat, mencerminkan efek kekayaan yang kuat, sikap kebijakan moneter yang kurang ketat, dan kondisi keuangan yang mendukung. Pertumbuhan diproyeksikan mencapai 2,7 persen pada tahun 2025. Angka ini 0,5 poin persentase lebih tinggi dari perkiraan pada bulan Oktober, yang sebagian mencerminkan kelanjutan dari tahun 2024 serta pasar tenaga kerja yang kuat dan percepatan investasi, di antara tanda-tanda kekuatan lainnya. Pertumbuhan diperkirakan akan menurun ke potensi pada tahun 2026.

Di kawasan euro, pertumbuhan diperkirakan akan meningkat tetapi pada kecepatan yang lebih bertahap daripada yang diantisipasi pada bulan Oktober, dengan ketegangan geopolitik yang terus membebani sentimen. Momentum yang lebih lemah dari yang diharapkan pada akhir tahun 2024, terutama di bidang manufaktur, dan meningkatnya ketidakpastian politik dan kebijakan menjelaskan revisi ke bawah sebesar 0,2 poin persentase menjadi 1,0 persen pada tahun 2025. Pada tahun 2026, pertumbuhan akan naik menjadi 1,4 persen, dibantu oleh permintaan domestik yang lebih kuat, karena kondisi keuangan yang longgar, kepercayaan diri meningkat, dan ketidakpastian agak surut.

Di negara-negara maju lainnya, dua kekuatan yang saling mengimbangi menjaga perkiraan pertumbuhan relatif stabil. Di satu sisi, pemulihan pendapatan riil diharapkan dapat mendukung pemulihan siklus konsumsi. Di sisi lain, hambatan perdagangan—termasuk peningkatan tajam ketidakpastian kebijakan perdagangan—diperkirakan akan membuat investasi tetap terkendali.

*Global growth is expected to remain stable, at 3.3 percent in both 2025 and 2026, the forecasts for growth are below the historical (2000–19) average of 3.7 percent and broadly unchanged from October. The overall picture, however, hides divergent paths across economies and a precarious global growth profile.*

*Among advanced economies, growth forecast revisions go in different directions. In the United States, underlying demand remains robust, reflecting strong wealth effects, a less restrictive monetary policy stance, and supportive financial conditions. Growth is projected to be at 2.7 percent in 2025. This is 0.5 percentage point higher than the October forecast, in part reflecting carryover from 2024 as well as robust labor markets and accelerating investment, among other signs of strength. Growth is expected to taper to potential in 2026.*

*In the euro area, growth is expected to pick up but at a more gradual pace than anticipated in October, with geopolitical tensions continuing to weigh on sentiment. Weaker-than-expected momentum at the end of 2024, especially in manufacturing, and heightened political and policy uncertainty explain a downward revision of 0.2 percentage point to 1.0 percent in 2025. In 2026, growth is set to rise to 1.4 percent, helped by stronger domestic demand, as financial conditions loosen, confidence improves, and uncertainty recedes somewhat.*

*In other advanced economies, two offsetting forces keep growth forecasts relatively stable. On the one hand, recovering real incomes are expected to support the cyclical recovery in consumption. On the other hand, trade headwinds—including the sharp uptick in trade policy uncertainty—are expected to keep investment subdued.*

Di pasar negara berkembang dan negara berkembang, kinerja pertumbuhan pada tahun 2025 dan 2026 diharapkan secara umum sama dengan tahun 2024. Sehubungan dengan proyeksi pada bulan Oktober, pertumbuhan pada tahun 2025 untuk Tiongkok direvisi sedikit ke atas sebesar 0,1 poin persentase menjadi 4,6 persen. Revisi ini mencerminkan sisa dari tahun 2024 dan paket fiskal yang diumumkan pada bulan November sebagian besar mengimbangi dampak negatif pada investasi dari meningkatnya ketidakpastian kebijakan perdagangan dan hambatan pasar properti. Pada tahun 2026, pertumbuhan sebagian besar diproyeksikan akan tetap stabil pada angka 4,5 persen, karena dampak ketidakpastian kebijakan perdagangan menghilang dan peningkatan usia pensiun memperlambat penurunan pasokan tenaga kerja. Di India, pertumbuhan diproyeksikan solid pada 6,5 persen pada tahun 2025 dan 2026, seperti yang diproyeksikan pada bulan Oktober dan sejalan dengan potensi.

Di Timur Tengah dan Asia Tengah, pertumbuhan diproyeksikan meningkat, tetapi kurang dari yang diharapkan pada bulan Oktober. Hal ini terutama mencerminkan revisi ke bawah sebesar 1,3 poin persentase terhadap pertumbuhan tahun 2025 di Arab Saudi, yang sebagian besar didorong oleh perpanjangan pemotongan produksi OPEC+. Di Amerika Latin dan Karibia, pertumbuhan keseluruhan diproyeksikan sedikit meningkat pada tahun 2025 menjadi 2,5 persen, meskipun ada perlambatan yang diharapkan di ekonomi terbesar di kawasan tersebut. Pertumbuhan di Afrika sub-Sahara diperkirakan meningkat pada tahun 2025, sementara itu diperkirakan akan melambat di negara-negara berkembang dan negara-negara Eropa yang sedang berkembang.

Estimasi volume perdagangan dunia direvisi sedikit ke bawah untuk tahun 2025 dan 2026. Revisi tersebut disebabkan oleh peningkatan tajam dalam ketidakpastian kebijakan perdagangan, yang kemungkinan akan merugikan investasi secara tidak proporsional di antara perusahaan-perusahaan yang melakukan perdagangan intensif. Meski demikian, pada dasarnya, dampak dari meningkatnya ketidakpastian diperkirakan bersifat sementara.

*In emerging market and developing economies, growth performance in 2025 and 2026 is expected to broadly match that in 2024. With respect to the projection in October, growth in 2025 for China is marginally revised upward by 0.1 percentage point to 4.6 percent. This revision reflects carryover from 2024 and the fiscal package announced in November largely offsetting the negative effect on investment from heightened trade policy uncertainty and property market drag. In 2026, growth is projected mostly to remain stable at 4.5 percent, as the effects of trade policy uncertainty dissipate and the retirement age increase slows down the decline in the labor supply. In India, growth is projected to be solid at 6.5 percent in 2025 and 2026, as projected in October and in line with potential.*

*In the Middle East and Central Asia, growth is projected to pick up, but less than expected in October. This mainly reflects a 1.3 percentage point downward revision to 2025 growth in Saudi Arabia, mostly driven by the extension of OPEC+ production cuts. In Latin America and the Caribbean, overall growth is projected to accelerate slightly in 2025 to 2.5 percent, despite an expected slowdown in the largest economies of the region. Growth in sub-Saharan Africa is expected to pick up in 2025, while it is forecast to slow down in emerging and developing Europe.*

*World trade volume estimates are revised downward slightly for 2025 and 2026. The revision owes to the sharp increase in trade policy uncertainty, which is likely to hurt investment disproportionately among trade-intensive firms. That said, in the baseline, the impact of heightened uncertainty is expected to be transitory.*

## Prospek

### *Prospect*

Lebih jauh, peningkatan arus perdagangan di awal mengingat tingginya ketidakpastian kebijakan perdagangan, dan sebagai antisipasi pembatasan perdagangan yang lebih ketat, memberikan beberapa kompensasi dalam jangka pendek.

Kemajuan dalam disinflasi diperkirakan akan terus berlanjut. Penyimpangan dari prakiraan WEO Oktober 2024 sangat minim. Pendinginan pasar tenaga kerja secara bertahap diperkirakan akan menahan tekanan permintaan. Dikombinasikan dengan penurunan harga energi yang diharapkan, inflasi utama diproyeksikan akan terus menurun menuju target bank sentral. Meski demikian, inflasi diproyeksikan mendekati, tetapi di atas, target 2 persen pada tahun 2025 di Amerika Serikat, sedangkan dinamika inflasi diperkirakan akan lebih tenang di kawasan euro. Inflasi rendah diproyeksikan akan terus berlanjut di Tiongkok. Akibatnya, kesenjangan antara suku bunga kebijakan yang diantisipasi di Amerika Serikat dan negara-negara lain menjadi lebih lebar.

### **Risiko terhadap Prospek**

#### *Risks to the Outlook*

Dalam jangka menengah, keseimbangan risiko terhadap prospek condong ke sisi negatif, dengan pertumbuhan global siap menjadi lebih rendah dari rata-rata 2025–26 dan prakiraan lima tahun ke depan sekitar 3 persen. Sebaliknya, risiko jangka pendek dapat memperkuat divergensi di berbagai negara: risiko cenderung meningkat di Amerika Serikat, sedangkan risiko penurunan terjadi di sebagian besar negara lain di tengah ketidakpastian kebijakan yang meningkat dan hambatan dari penyesuaian yang sedang berlangsung (khususnya, energi di Eropa dan real estat di Tiongkok).

Peningkatan kebijakan proteksionis, misalnya, dalam bentuk gelombang tarif baru, dapat memperburuk ketegangan perdagangan, menurunkan investasi, mengurangi efisiensi pasar, mendistorsi arus perdagangan, dan kembali mengganggu rantai pasokan. Pertumbuhan dapat menurun baik dalam jangka pendek maupun menengah, tetapi pada tingkat yang berbeda-beda di berbagai negara.

*Furthermore, the front-loading of some trade flows in view of elevated trade policy uncertainty, and in anticipation of tighter trade restrictions, provides some offset in the near term.*

*Progress on disinflation is expected to continue. Deviations from the October 2024 WEO forecasts are minimal. The gradual cooling of labor markets is expected to keep demand pressures at bay. Combined with the expected decline in energy prices, headline inflation is projected to continue its descent toward central bank targets. That said, inflation is projected to be close to, but above, the 2 percent target in 2025 in the United States, whereas inflationary dynamics are expected to be more subdued in the euro area. Low inflation is projected to persist in China. Consequently, the gap between anticipated policy rates in the United States and other countries becomes wider.*

*In the medium term, the balance of risks to the outlook is tilted to the downside, with global growth poised to be lower than its 2025–26 average and five-year-ahead forecasts at about 3 percent. Near-term risks, in contrast, could reinforce divergences across countries: they are tilted to the upside in the United States, whereas downside risks prevail in most other economies amid elevated policy uncertainty and headwinds from ongoing adjustments (in particular, energy in Europe and real estate in China).*

*An intensification of protectionist policies, for instance, in the form of a new wave of tariffs, could exacerbate trade tensions, lower investment, reduce market efficiency, distort trade flows, and again disrupt supply chains. Growth could suffer in both the near and medium term, but at varying degrees across economies.*

Kebijakan fiskal yang lebih longgar di Amerika Serikat, yang didorong oleh langkah-langkah ekspansif baru seperti pemotongan pajak, dapat meningkatkan aktivitas ekonomi dalam jangka pendek, dengan sedikit dampak positif pada pertumbuhan global. Namun, dalam jangka panjang, hal ini mungkin memerlukan penyesuaian kebijakan fiskal yang lebih besar yang dapat mengganggu pasar dan ekonomi, dengan berpotensi melemahkan peran Treasury AS sebagai aset aman global, antara lain. Lebih jauh lagi, pinjaman yang lebih tinggi untuk mendanai kebijakan fiskal yang lebih longgar dapat meningkatkan permintaan modal secara global, yang mengarah pada peningkatan suku bunga dan kemungkinan menekan aktivitas ekonomi di tempat lain.

Keyakinan dan sentimen positif di Amerika Serikat, yang sebagian didorong oleh deregulasi, dapat meningkatkan permintaan dan sisi penawaran ekonomi. Sementara pelonggaran regulasi yang terlalu ketat dan pengurangan birokrasi untuk bisnis dapat memacu pertumbuhan AS jangka pendek melalui investasi yang lebih tinggi, apresiasi dolar dapat memicu risiko arus keluar modal dari pasar berkembang dan ekonomi berkembang dan mendorong premi risiko naik. Selain itu, pencabutan regulasi yang berlebihan yang dirancang untuk membatasi pengambilan risiko dan akumulasi utang dapat menghasilkan dinamika naik-turun bagi Amerika Serikat dalam jangka panjang, dengan dampak bagi seluruh dunia. Risiko penurunan stabilitas keuangan makro dapat diperkuat jika diperparah oleh prospek fiskal yang lebih lemah atau kemajuan yang terhenti pada reformasi struktural. Guncangan sisi penawaran lainnya, seperti gangguan tenaga kerja yang didorong oleh pengurangan arus migrasi ke Amerika Serikat, dapat secara permanen mengurangi potensi output dan meningkatkan inflasi selama periode penyesuaian.

*Looser fiscal policy in the United States, driven by new expansionary measures such as tax cuts, could boost economic activity in the near term, with small positive spillovers onto global growth. Yet in the longer run, this may require a larger fiscal policy adjustment that could become disruptive to markets and the economy, by potentially weakening the role of US Treasuries as the global safe asset, among other things. Furthermore, higher borrowing to fund looser fiscal policy could increase demand for capital globally, leading to an increase in interest rates and possibly depressing economic activity elsewhere.*

*Confidence and positive sentiment in the United States, partly driven by deregulation, could boost both the demand and the supply side of the economy. While relaxation of unduly tight regulations and reduced red tape for businesses may spur near-term US growth through higher investment, dollar appreciation could fuel risks of capital outflows from emerging market and developing economies and drive risk premiums upward. Moreover, an excessive rollback of regulations designed to put limits on risk-taking and debt accumulation may generate boom-bust dynamics for the United States in the longer term, with repercussions for the rest of the world. Downside risks to macro-financial stability may be amplified if compounded by a weaker fiscal outlook or stalled progress on structural reforms. Other supply-side shocks, such as labor force disruptions driven by reductions in migration flows to the United States, may permanently reduce potential output and raise inflation during the adjustment period.*

## Risiko terhadap Prospek

### *Risks to the Outlook*

Peningkatan jangka pendek bagi ekonomi AS yang berasal dari faktor-faktor ini akan semakin menggarisbawahi pola pertumbuhan yang berbeda di berbagai negara. Jika efek buruk tarif dan pengurangan tenaga kerja mendominasi, aktivitas global serta aktivitas di Amerika Serikat mungkin terpengaruh secara negatif dalam jangka menengah. Ketidakpastian tinggi: efek dari setiap faktor akan berkembang secara berbeda di berbagai negara, dipengaruhi oleh hubungan perdagangan dan keuangan; respons kebijakan terhadap tindakan yang diambil oleh negara lain dapat terjadi dalam berbagai cara, termasuk peningkatan tarif pembalasan; dan dampak dari berbagai kombinasi kebijakan atau besaran perubahan kebijakan yang berbeda dapat sangat berbeda.

Dinamika inflasi dapat dibentuk ke arah yang berlawanan oleh faktor-faktor ini. Besarnya efek inflasi dari tarif sangat tidak pasti. Sementara studi empiris baru-baru ini menemukan dampak yang tinggi terhadap harga impor, estimasi dampak terhadap harga konsumen lebih rendah dan tunduk pada ketidakpastian yang signifikan. Namun demikian, dibandingkan dengan apa yang terjadi pada episode sengketa perdagangan sebelumnya, beberapa faktor menunjukkan bahwa risiko kenaikan inflasi dari kenaikan tarif dapat lebih tinggi kali ini. Pertama, ekonomi global baru saja keluar dari lonjakan inflasi paling signifikan dalam ingatan baru-baru ini.

Risiko tekanan inflasi yang baru dapat mendorong bank sentral untuk menaikkan suku bunga kebijakan dan mengintensifkan divergensi kebijakan moneter. Suku bunga yang lebih tinggi untuk jangka waktu yang lebih lama dapat memperburuk risiko fiskal, keuangan, dan eksternal. Dolar AS yang lebih kuat, yang timbul dari perbedaan suku bunga dan tarif, di antara faktor-faktor lainnya, dapat mengubah pola aliran modal dan ketidakseimbangan global serta mempersulit trade-off ekonomi makro.

*A near-term boost for the US economy emanating from these factors would further underscore the divergent growth patterns across economies. If the adverse effects of tariffs and reduction in the labor force dominate, global activity as well as activity in the United States might be affected negatively in the medium term. Uncertainties are high: the effects of each factor would unfold differently across countries, influenced by trade and financial linkages; policy responses to actions taken by other countries could play out in a variety of ways, including an escalation of retaliatory tariffs; and the impacts of different policy combinations or different magnitudes of policy changes could be quite different.*

*Inflation dynamics could be shaped in opposite directions by these factors. The magnitude of the inflationary effect from tariffs is especially uncertain. While recent empirical studies find high pass-through to import prices, estimates of pass-through to consumer prices are lower and subject to significant uncertainty. Nevertheless, compared with what took place in earlier episodes of trade disputes, several factors suggest that upside risks to inflation from tariff hikes could be higher this time. First, the global economy is coming out of the most significant inflation surge in recent memory.*

*The risk of renewed inflationary pressures could prompt central banks to raise policy rates and intensify monetary policy divergence. Higher-for-even-longer interest rates could worsen fiscal, financial, and external risks. A stronger US dollar, arising from interest rate differentials and tariffs, among other factors, could alter capital flow patterns and global imbalances and complicate macroeconomic trade-offs.*

Di sisi positifnya, aktivitas ekonomi global dapat mengalami peningkatan jika pemerintah yang baru dapat merundingkan kembali perjanjian perdagangan yang ada dan membuat kesepakatan baru. Hal ini dapat meredakan ketidakpastian dengan lebih cepat dan tidak terlalu mengganggu pertumbuhan dan inflasi. Dengan meningkatkan kepercayaan, hasil kerja sama tersebut bahkan dapat mendukung investasi dan prospek pertumbuhan jangka menengah.

*On the upside, global economic activity may enjoy a bounce if incoming governments can renegotiate existing trade agreements and forge new deals. This could relieve uncertainty faster and be much less disruptive to growth and inflation. By boosting confidence, such cooperative outcomes could even support investment and medium-term growth prospects.*

Momentum di bidang kebijakan lain juga dapat meningkatkan pertumbuhan. Banyak negara dapat merangkul reformasi struktural untuk mencegah divergensi dari negara-negara yang berkinerja lebih baik agar tidak mengakar. Upaya untuk meningkatkan pasokan tenaga kerja, mengurangi kesalahan alokasi, meningkatkan persaingan, dan mendukung inovasi dapat meningkatkan pertumbuhan jangka menengah.

*Momentum on other policy fronts could also lift growth. Many countries may embrace structural reforms to prevent divergence from their better-performing peers from becoming entrenched. Efforts to increase labor supply, reduce misallocation, enhance competition, and support innovation could raise medium-term growth.*

## KONDISI PEREKONOMIAN DAN PERBANKAN INDONESIA TAHUN 2024

*Indonesian Economic and Banking Conditions in 2024*

Di sepanjang tahun 2024, perekonomian global diwarnai oleh berbagai tantangan kompleks. Ketegangan geopolitik, inflasi yang masih tinggi, serta kebijakan moneter ketat yang diterapkan oleh negara-negara maju memberikan tekanan besar terhadap laju pertumbuhan ekonomi dunia. Perang dagang yang berkelanjutan antara Amerika Serikat dan China turut memberikan dampak signifikan pada perdagangan global, dengan adanya tarif yang saling dikenakan antara dua ekonomi terbesar dunia tersebut. Ketegangan ini tidak hanya mempengaruhi sektor perdagangan barang, tetapi juga mengganggu aliran investasi global serta memperburuk ketidakpastian ekonomi.

Konflik yang berkepanjangan di berbagai wilayah, termasuk ketidakstabilan di Timur Tengah dan perang yang masih berlangsung di Ukraina, menyebabkan gangguan signifikan terhadap rantai pasokan global. Sebagai akibatnya, harga komoditas energi dan pangan—seperti minyak, gas, dan gandum—mengalami lonjakan yang turut mendorong inflasi di banyak negara.

*Throughout 2024, the global economy was marked by a range of complex challenges. Geopolitical tensions, persistently high inflation, and tight monetary policies adopted by developed countries put significant pressure on global economic growth. The ongoing trade war between the United States and China also had a significant impact on global trade, with tariffs being imposed on each other by the two largest economies in the world. This tension affected not only the goods trade sector but also disrupted global investment flows and exacerbated economic uncertainty.*

*Ongoing conflicts in various regions, including instability in the Middle East and the ongoing war in Ukraine, caused major disruptions to global supply chains. As a result, energy and food commodity prices—such as oil, gas, and wheat—surged, further driving inflation in many countries.*

Bagi Indonesia, dampak dari kondisi global ini turut dirasakan, meskipun perekonomian domestik menunjukkan ketahanan yang cukup baik. Inflasi dalam negeri tetap berada dalam kendali berkat kebijakan fiskal dan moneter yang efektif. Konsumsi domestik yang kuat menjadi faktor utama dalam menjaga stabilitas ekonomi nasional, sementara harga komoditas yang tinggi –terutama batu bara dan crude palm oil (CPO)– memberikan dorongan bagi ekspor Indonesia.

Namun demikian, Indonesia juga menghadapi tantangan yang tidak bisa diabaikan, seperti ketidakpastian akibat suku bunga global yang tinggi serta ketergantungan pada ekspor komoditas mentah. Dalam jangka panjang, kebijakan hilirisasi yang diterapkan pemerintah diharapkan dapat meningkatkan nilai tambah industri nasional dan mengurangi risiko akibat fluktuasi harga komoditas di pasar internasional.

Secara keseluruhan, evaluasi terhadap perekonomian tahun 2024 menunjukkan bahwa Indonesia mampu melewati berbagai tantangan dengan cukup baik. Pertumbuhan ekonomi nasional tetap berada di kisaran 5%, sejalan dengan target yang telah ditetapkan oleh pemerintah. Inflasi pun tetap terkendali dalam kisaran yang diharapkan, sementara investasi, baik asing maupun domestik, terus menunjukkan tren positif, terutama di sektor infrastruktur dan industri berbasis sumber daya alam.

*For Indonesia, the impact of these global conditions has been evident, though the domestic economy has shown remarkable resilience. Inflation remained well-controlled thanks to effective fiscal and monetary policies. Strong domestic consumption was the key factor in maintaining national economic stability, while the high prices of commodities, particularly coal and crude palm oil (CPO), provided a boost to Indonesia's exports.*

*However, Indonesia also faces challenges that cannot be ignored, such as uncertainty from high global interest rates and the ongoing dependence on raw commodity exports. In the long term, the government's policies on downstream industries are expected to increase the added value of national industries and reduce risks from fluctuations in global commodity prices.*

*Overall, an evaluation of the 2024 economy shows that Indonesia has managed to weather these challenges effectively. National economic growth remained around 5%, in line with the government's target. Inflation was kept within the expected range, while investment, both foreign and domestic, continued to show positive trends, especially in the infrastructure and natural resource-based industries.*

### **Klasifikasi sebagai Liabilitas Lain-lain dalam Laporan Keuangan**

Saham-saham preferen yang diterbitkan oleh PT Bank SBI Indonesia kepada Hana Bank diklasifikasikan dalam liabilitas lain-lain dalam laporan keuangan karena adanya hak dalam bentuk opsi jual yang memberikan pemegangnya, yaitu Hana Bank, hak untuk menjual saham yang dimilikinya, dengan kewajiban bagi State Bank of India sebagai pemegang saham mayoritas dari PT Bank SBI Indonesia untuk membeli saham opsi jual tersebut jika Hana Bank melaksanakan opsi jual tersebut dan pembeli tidak ditemukan dalam batas waktu yang tercantum dalam pemberitahuan terkait.

Pengklasifikasian ke dalam liabilitas lain-lain tersebut sesuai dengan arahan dari kantor akuntan publik mengenai standar akuntansi yang berlaku.

### **Classification as Other Liabilities in Financial Statements**

*Preferred shares issued by PT Bank SBI Indonesia to Hana Bank are classified under other liabilities in the financial statements due to the existence of right in the form of a put option that gives the holder, being Hana Bank, the right to sell the shares that it owns, with an obligation for State Bank of India as the majority shareholder of the Bank to purchase the put option shares if Hana Bank exercises the put option and a buyer is not found within the deadline in the related notice.*

*The classification into other liabilities is also due to the fact that dividends to which Hana Bank is entitled are cumulative in nature (and can be deferred if the Bank suffers a loss), which will dilute the portion of dividends that State Bank of India is entitled to receive in normal course.*

*The classification into other liabilities is in accordance with the directions of the public accounting firm regarding applicable accounting standards.*

## Pilar 2. Kecukupan Kebijakan dan Prosedur Manajemen Risiko Serta Penetapan Limit Risiko

### Pillar 2. Adequacy of Risk Management Policies and Procedures as well as Determination of Risk Limits

Kebijakan Manajemen Risiko merupakan arahan tertulis dalam menerapkan manajemen risiko dan harus sejalan dengan visi, misi dan rencana strategik serta lebih berfokus pada risiko yang relevan dalam aktivitas usaha/bisnis BSBII, serta disusun dengan memperhatikan tingkat risiko yang bersedia diambil (risk appetite), toleransi risiko (risk tolerance) serta penetapan limit.

*Risk Management Policy is a written direction in implementing risk management and it must be in line with the Risk Management Policy is a written direction in implementing risk management and it must be in line with the vision, mission and strategic plans and focus more on the relevant risks in BSBII's business/business activities. It should be prepared by taking into account the level of risk that is willing to be taken (risk appetite), risk tolerance (risk tolerance) and setting limits as well.*

Prosedur Manajemen Risiko merupakan penjabaran serta aturan pelaksanaan dari Kebijakan Manajemen Risiko dan digunakan sebagai acuan pelaksanaan pengelolaan risiko bagi setiap Unit Pengelola Risiko dan seluruh unit organisasi BSBII, serta didokumentasikan secara memadai. Ketentuan secara detail dari masing-masing Kebijakan diatur dalam Standard Operating Procedures (SOP). Evaluasi dan/atau pengkinian terhadap Kebijakan dan Prosedur Manajemen Risiko BSBII dilakukan secara berkala, atau dalam hal terjadi perubahan secara signifikan yang mempengaruhi kegiatan usaha BSBII.

*The Risk Management Procedure is the elaboration and implementing rules of the Risk Management Policy and is used as a reference for the implementation of risk management for each Risk Management Unit and all BSBII organizational units, and is adequately documented. Detailed provisions of each Policy are regulated in the Standard Operating Procedures (SOP). Evaluation and/or updating of BSBII's Risk Management Policies and Procedures is carried out periodically, or in case of significant changes that affect BSBII's business activities.*

Sebagai salah satu metode pengendalian Risiko, BSBII juga telah memiliki limit risiko. Limit risiko merupakan ambang batas untuk menentukan tingkat intensitas mitigasi risiko yang akan dilaksanakan oleh manajemen. Penetapan limit risiko BSBII mencakup limit per Risiko (Risiko kredit, Risiko pasar, dan Risiko likuiditas), limit per aktivitas fungsional maupun limit secara keseluruhan. Penetapan limit diatur didalam kebijakan dan prosedur, SK Direksi, Memo Internal, dll dan ditegaskan kembali dalam Risk Appetite Statement. Kebijakan, prosedur dan limit Risiko tersebut secara berkala dilakukan review dengan persetujuan sampai dengan tingkat Direksi melalui rapat komite ataupun melalui sirkulasi kepada Direksi sesuai dengan tingkat kewenangan.

*As one of the risk control methods, BSBII also has risk limits. Risk limit is a threshold for determining the level of intensity of risk mitigation that will be implemented by management. Setting BSBII risk limits includes limits per risk (credit risk, market risk, and liquidity risk), limits per functional activity and limits as a whole. Determination of limits is regulated in policies and procedures, Directors' Decrees, Internal Memos, etc. and is reaffirmed in the Risk Appetite Statement. The policies, procedures and risk limits are periodically reviewed with approval up to the level of the Board of Directors through committee meetings or through circulation to the Board of Directors in accordance to the level of authority. vision, mission and strategic plans and focus more on the relevant risks in BSBII's business/business activities. It should be prepared by taking into account the level of risk that is willing to be taken (risk appetite), risk tolerance (risk tolerance) and setting limits as well.*

### **Pilar 3. Kecukupan Proses Identifikasi, Pengukuran, Pemantauan, dan Pengendalian Risiko, serta Sistem Informasi Manajemen Risiko**

*Pillar 3. Adequacy of Processes in Risk Identification, Measurement, Monitoring and Control, as well as Risk Management Information Systems*

Proses Manajemen Risiko di BSBII meliputi tahapan identifikasi, pengukuran, pemantauan dan pengendalian risiko terhadap 8 (delapan) jenis risiko secara berkesinambungan terhadap seluruh faktor risiko yang bersifat material dengan didukung oleh Sistem Informasi Manajemen Risiko

*The Risk Management process at BSBII includes the stages of identification, measurement, monitoring and risk control of 8 (eight) types of risk on an ongoing basis against all material risk factors supported by Risk Management Information System*

Kebijakan mengenai proses identifikasi, pengukuran, pemantauan, dan pengendalian risiko untuk 8 (delapan) jenis risiko (risiko kredit, pasar, likuiditas, operasional, hukum, strategik, kepatuhan dan reputasi) ditetapkan dalam Kebijakan Manajemen Risiko.

*Policies regarding the process of identifying, measuring, monitoring, and controlling risks for 8 (eight) types of risk (credit, market, liquidity, operational, legal, strategic, compliance and reputation risks) are stipulated in the Risk Management Policy.*

#### **1. Identifikasi Risiko**

Proses identifikasi risiko dilakukan secara proaktif terhadap seluruh aktivitas bisnis dalam rangka menganalisa sumber, tingkat kemungkinan timbulnya risiko dan dampaknya. Hal-hal yang diperhatikan dalam proses identifikasi risiko adalah:

- a. Identifikasi seluruh risiko dilakukan secara berkala;
- b. Memiliki metode atau sistem untuk melakukan identifikasi risiko pada seluruh produk dan aktivitas bisnis BSBII;
- c. Secara khusus melakukan identifikasi risiko terhadap produk dan aktivitas baru, sebelum produk/aktivitas baru diperkenalkan atau dijalankan.

#### **1. Risk identification**

*The risk identification process is carried out proactively in all business activities in order to analyze the source, the level of risk possibility and its impact. Things to consider in the risk identification process are:*

- a. *Identification of all risks is carried out periodically;*
- b. *Have a method or system to identify risks in all BSBII products and business activities;*
- c. *Specifically identify risks to new products and activities, before new products/activities are introduced or implemented.*

#### **2. Pengukuran risiko**

Proses pengukuran risiko dilakukan dalam rangka mengetahui besarnya eksposur risiko sebagai acuan untuk melakukan pengendalian risiko serta untuk keperluan perhitungan Kewajiban Penyediaan Modal Minimum. Pengukuran risiko dilakukan baik secara kuantitatif dan/atau kualitatif sesuai metode pengukuran yang telah ditetapkan oleh Regulator atau dengan menggunakan metode internal yang dikembangkan sendiri oleh BSBII berdasarkan best practice dalam pengukuran risiko. Untuk mengantisipasi kondisi yang bersifat ekstrem, pengukuran risiko di BSBII juga dilengkapi dengan stress testing untuk risiko kredit, risiko pasar dan risiko likuiditas.

#### **2. Risk measurement**

*The risk measurement process is carried out in order to determine the amount of risk exposure as a reference for carrying out risk control and for the purposes of calculating the Minimum Capital Adequacy Requirement. Risk measurement is carried out both quantitatively and/or qualitatively according to the measurement method set by the Regulator or by using an internal method developed by BSBII based on best practice in risk measurement. To anticipate extreme conditions, risk measurement at BSBII is also equipped with stress testing for credit risk, market risk and liquidity risk.*

Hal-hal yang diperhatikan dalam pelaksanaan pengukuran risiko adalah:

- a. Ruang lingkup pengukuran risiko paling tidak mengukur sensitivitas, kecenderungan, faktor risiko secara individu, eksposur risiko secara keseluruhan maupun per risiko dengan mempertimbangkan korelasi, dan seluruh risiko yang melekat pada transaksi serta produk bank;
- b. Metode pengukuran risiko dapat dilakukan secara kuantitatif dan/atau kualitatif dengan menggunakan metode yang ditetapkan oleh Regulator maupun yang dikembangkan sendiri secara internal;
- c. Penerapan metode pengukuran disesuaikan ketentuan Regulator yang berlaku;
- d. Penggunaan metode internal dalam hal pengukuran risiko kredit, risiko pasar dan risiko operasional, harus mempertimbangkan persyaratan Regulator, antara lain persyaratan penggunaan, backtesting, validasi, dan dokumentasi;
- e. Pengukuran risiko dilakukan oleh Unit Pengelola Risiko berkoordinasi dengan Satuan Kerja Manajemen Risiko;
- f. Pengukuran risiko untuk BSBII secara individu dilakukan terhadap 8 (delapan) jenis risiko. Untuk keperluan pelaporan Kewajiban Penyediaan Modal Minimum (KPMM) kepada Regulator, pengukuran risiko BSBII secara individu dilakukan terhadap 3 (tiga) risiko utama yakni risiko kredit, risiko pasar dan risiko operasional.

Pengukuran risiko dilakukan secara berkala di mana hasil pengukuran dilaporkan kepada Regulator sebagai bagian dari pelaporan Profil Risiko dan KPMM BSBII.

### 3. Pemantauan risiko

Proses pemantauan risiko dilakukan untuk memastikan bahwa risiko telah dikelola dengan baik antara lain dengan melakukan pemantauan terhadap mitigasi dan limit risiko yang telah ditetapkan. Hal-hal yang diperhatikan dalam pelaksanaan pemantauan risiko adalah:

*The things that are considered in the implementation of risk measurement are:*

- a. The scope of risk measurement at least measures sensitivity, tendency, individual risk factors, risk exposure as a whole and per risk by considering correlations, and all risks inherent in bank transactions and products;*
- b. Risk measurement methods can be carried out quantitatively and/or qualitatively by using methods set by the Regulator or those developed internally;*
- c. The application of the measurement method is adjusted to the provisions of the applicable Regulator;*
- d. The use of internal methods in terms of measuring credit risk, market risk and operational risk, must consider Regulatory requirements, including requirements for use, backtesting, validation and documentation;*
- e. Risk measurement is carried out by the Risk Management Unit in coordination with the Risk Management Work Unit*
- f. Risk measurement for BSBII individually is carried out for 8 (eight) types of risk. For the purposes of reporting the Minimum Capital Adequacy Requirement (KPMM) to Regulators, individual BSBII risk measurements are carried out on 3 (three) main risks namely credit risk, market risk and operational risk.*

*Risk measurement is carried out periodically where the measurement results are reported to the Regulator as part of the BSBII Risk Profile and KPMM reporting.*

### 3. Risk monitoring

*The risk monitoring process is carried out to ensure that risks are managed properly, among others by monitoring the mitigation and risk limits that have been set. The things that are considered in the implementation of risk monitoring are:*

- a. Pemantauan risiko mencakup antara lain pemantauan terhadap besarnya eksposur risiko, toleransi risiko, kepatuhan limit, dan hasil stress testing serta konsistensi pelaksanaan terhadap kebijakan dan prosedur yang telah ditetapkan;
- b. Pemantauan risiko dilakukan baik oleh Satuan Kerja Operasional maupun Satuan Kerja Manajemen Risiko;
- c. Hasil pemantauan disajikan dalam laporan yang disampaikan secara berkala kepada pihak eksternal (Regulator) maupun internal (Manajemen).

Pemantauan risiko dilakukan baik oleh Satuan Kerja Operasional (risk taking unit) sebagai pemilik risiko (risk owner) maupun oleh risk control unit, dan hasil pemantauan disajikan dalam laporan secara berkala antara lain Laporan Portofolio Pinjaman, Laporan Pemantauan Risiko Pasar dan Risiko Likuiditas, Laporan Insiden & Kerugian Risiko Operasional, Laporan Pemantauan Business Continuity Management (BCM), Self Assessment, Laporan Profil Risiko, Laporan Tingkat Kesehatan Bank, dan Laporan Kewajiban Penyediaan Modal Minimum (KPMM).

#### 4. Pengendalian risiko

Proses pengendalian risiko dilakukan terutama untuk mengelola risiko yang dapat mengganggu kelangsungan usaha BSBII. Hal-hal yang diperhatikan dalam pengendalian risiko adalah:

- a. Sistem pengendalian risiko mengacu pada kebijakan dan prosedur yang telah ditetapkan;
- b. Proses pengendalian risiko disesuaikan dengan eksposur risiko maupun tingkat risiko yang akan diambil (risk appetite) dan toleransi risiko (risk tolerance);
- c. Mekanisme lindung nilai dan mitigasi risiko dilakukan oleh Satuan Kerja Operasional bekerja sama dengan Satuan Kerja Manajemen Risiko.

- a. *Risk monitoring includes, among other things, monitoring of the magnitude of risk exposure, risk tolerance, compliance with limits, and results of stress testing as well as the consistency of implementation of established policies and procedures;*
- b. *Risk monitoring is carried out by both the Operational Work Unit and the Risk Management Work Unit;*
- c. *Monitoring results are presented in reports submitted periodically to external (Regulators) and internal (Management) parties.*

*Risk monitoring is carried out both by the Operational Work Unit (risk taking unit) as the risk owner and by the risk control unit, and the monitoring results presented in regular reports include Loan Portfolio Reports, Market Risk and Liquidity Risk Monitoring Reports, Incident & Operational Risk Losses Reports, Business Continuity Management (BCM) Monitoring Reports, Self Assessment, Risk Profile Reports, Bank Soundness Level Reports, and Minimum Capital Adequacy Requirements (KPMM) Reports.*

#### 4. Risk control

*The risk control process is carried out mainly to manage risks that can disrupt BSBII's business continuity. Things to consider in risk control are:*

- a. *The risk control system refers to the established policies and procedures;*
- b. *The risk control process is adjusted to the risk exposure and the level of risk to be taken (risk appetite) and risk tolerance;*
- c. *The mechanism for hedging and risk mitigation is carried out by the Operational Work Unit in collaboration with the Risk Management Work Unit.*

Strategi pengendalian risiko yang dapat dilakukan antara lain sebagai berikut:

- a. **Menerima Risiko (*Risk Acceptance*)**  
Untuk jenis risiko yang secara proses tidak memungkinkan untuk dilakukan intervensi pencegahan atau perbaikan situasi, maka potensi risiko yang ada akan diterima sebagai konsekuensi bank dalam memanfaatkan kesempatan bisnis, dengan pertimbangan bahwa risiko yang ada masih dalam limit/toleransi Bank. Namun demikian, kontrol yang ketat harus dijalankan apabila strategi pengendalian risiko ini diterapkan.
- b. **Menghindari Risiko (*Risk Avoidance*)**  
Risk avoidance dilakukan untuk mencegah BSBII mengalami suatu risiko yang tidak dapat diterima (*unacceptable*), atau mencegah bertambahnya eksposur risiko yang ada. Risk avoidance dipilih apabila potensi keuntungan dari suatu aktivitas bisnis lebih kecil dari pada eksposur risiko yang mungkin terjadi.
- c. **Memindahkan Risiko (*Risk Transfer*)**  
Pada strategi pemindahan risiko, risiko yang ada masih melekat pada aktivitas bisnis tersebut, namun risiko tersebut dialihkan kepada pihak lain. Salah satu metode pemindahan risiko yang paling umum dilakukan adalah pemanfaatan jasa asuransi atau tenaga alih daya (*outsourcing*).
- d. **Mengurangi Risiko (*Risk Mitigation*)**  
Pengendalian risiko akan optimal apabila dilakukan upaya-upaya untuk dapat mengurangi risiko yang ada. Mitigasi risiko dimaksudkan untuk memperkecil kerugian yang dipicu oleh faktor eksternal, maupun kejadian di internal bank. Salah satu alternatif untuk menekan dan mengurangi risiko adalah melalui peningkatan kontrol dan penyempurnaan sistem dan prosedur kerja.

## 5. Sistem informasi Manajemen risiko

Sistem informasi Manajemen Risiko harus dapat mendukung pelaksanaan proses identifikasi, pengukuran, pemantauan, dan pengendalian risiko.

*Risk control strategies that can be carried out include the following:*

- a. ***Risk Acceptance***  
*For types of risks that are not possible for preventive interventions to be carried out or for the situation to be improved, then the potential risks will be accepted as a consequence of the bank taking advantage of business opportunities, by taking into account that the existing risks are still within the Bank's limits/tolerance. However, strict controls must be implemented if this risk control strategy is implemented.*
- b. ***Risk Avoidance***  
*Risk avoidance is carried out to prevent BSBII from experiencing an unacceptable risk, or preventing an increase in existing risk exposure. Risk avoidance is chosen if the potential of profit from a business activity is smaller than the risk exposure that may occur.*
- c. ***Risk Transfer***  
*In the risk transfer strategy, the existing risks are still connected to the business activity, but these risks are transferred to other parties. One of the most common methods of transferring risk is the use of insurance services or outsourcing.*
- d. ***Risk Mitigation***  
*Risk control will be optimal if efforts are made to reduce existing risks. Risk mitigation is intended to minimize losses triggered by external factors, as well as events within the bank. One alternative to suppress and reduce risk is through increased control and improvement of work systems and procedures.*

## 5. Risk management information system

*The Risk Management information system must be able to support the implementation of risk identification, measurement, monitoring and control processes.*

a. Manajemen Data Risiko

Manajemen data risiko merupakan pengelolaan data risiko yang dipergunakan untuk memastikan tingkat ketersediaan, akurasi serta ketepatan waktu penyaluran informasi/laporan manajemen risiko serta pihak-pihak yang berkepentingan terhadap laporan manajemen Risiko.

- i) Frekuensi penyampaian laporan disesuaikan dengan kebutuhan pihak-pihak yang berkepentingan, sehingga mampu memberikan informasi yang memadai bagi pengambil keputusan;
- ii) Mekanisme lindung nilai dan mitigasi risiko dilakukan oleh Satuan Kerja Operasional bekerja sama dengan Satuan Kerja Manajemen Risiko.

Efektivitas Pelaksanaan Sistem Informasi Manajemen Risiko BSBII meliputi:

- a. Ketersediaan informasi yang akurat, lengkap, informatif, tepat waktu, serta dapat digunakan Dewan Komisaris, Direksi, dan unit kerja terkait dalam penerapan Manajemen Risiko untuk menilai, memantau, dan memitigasi Risiko yang dihadapi BSBII baik risiko keseluruhan maupun per jenis risiko;
- b. Efektivitas penerapan Manajemen Risiko mencakup kebijakan, prosedur dan penetapan limit risiko;
- c. Mekanisme lindung nilai dan mitigasi risiko dilakukan oleh Satuan Kerja Operasional bekerja sama dengan Satuan Kerja Manajemen Risiko.

Sebelum menerapkan sistem informasi manajemen risiko yang baru, harus dilakukan pengujian untuk memastikan bahwa proses dan output yang dihasilkan telah melalui proses pengembangan, pengujian, dan penilaian kembali secara efektif dan akurat.

In addition, it also takes into account the cash flow projections for monthly installment payments for credit instruments with a fixed rate type, while for loans with a floating rate type, it is determined to have a repricing period of 1 (one) month.</i></p>                  |

## Analisi Kualitatif

Dalam pengukuran dan perhitungan IRRBB, Bank menerapkan 6 (enam) jenis skenario shock suku bunga untuk perhitungan  $\Delta EVE$ , yaitu parallel up, parallel down, steepener, flattener, short rates up, dan short rates down. Sedangkan untuk perhitungan  $\Delta NII$  menggunakan 2 (dua) skenario shock, yaitu parallel up dan parallel down. Dalam proses scenario shock suku bunga, Bank menggunakan 2 (dua) jenis mata uang, yaitu mata uang rupiah dan mata uang valuta asing (USD).

Seluruh asumsi pemodelan yang dilakukan oleh Bank dalam perhitungan IRRBB telah sesuai dengan pendekatan standar maupun acuan yang telah ditetapkan oleh Regulator. Sehingga untuk saat ini Bank tidak memiliki asumsi pemodelan khusus yang memiliki pendekatan yang berbeda ketentuan regulator. Bank saat ini tidak melakukan tindakan lindung nilai (hedging) terhadap IRRBB.

Bank menentukan model credit prepayment risk (CPR) berdasarkan data historis terpanjang yang dimiliki oleh Bank. Penentuan rate CPR dilakukan dengan cara membandingkan plafond kredit yang memiliki status pelunasan dipercepat (prepayment) dengan seluruh plafond kredit yang dimiliki pada data historis, baik yang berstatus pelunasan dipercepat, berstatus lunas sesuai dengan tanggal jatuh tempo, maupun yang masih berstatus aktif. Selanjutnya diperoleh nilai rate CPR yang digunakan sebagai asumsi awal adanya potensi Kredit yang pelunasannya akan dipercepat dalam perhitungan proyeksi cashflow IRRBB.

Bank menentukan model term deposit redemption Ratio (TDRR) berdasarkan data historis terpanjang yang dimiliki oleh Bank. Penentuan rate TDRR dilakukan dengan cara membandingkan outstanding deposito yang memiliki status pelunasan dipercepat (prepayment) dengan seluruh plafond kredit yang dimiliki pada data historis, baik yang berstatus pelunasan dipercepat, berstatus lunas sesuai dengan tanggal jatuh tempo, maupun yang masih berstatus aktif. Selanjutnya diperoleh nilai rate CPR yang digunakan sebagai asumsi awal adanya potensi Kredit yang pelunasannya akan dipercepat dalam perhitungan proyeksi cashflow IRRBB.

## Qualitative Analysis

*In measuring and calculating IRRBB, the Bank applies 6 (six) types of interest rate shock scenarios for  $\Delta EVE$  calculations, namely parallel up, parallel down, steepener, flattener, short rates up, and short rates down. Meanwhile, for the calculation of  $\Delta NII$ , 2 (two) shock scenarios are used, namely parallel up and parallel down. In the interest rate shock scenario process, the Bank uses 2 (two) types of currency, namely the rupiah currency and foreign currency (USD).*

*All modeling assumptions made by the Bank in the IRRBB calculation are in accordance with the standard approach and references set by the Regulator. So for now the Bank does not have specific modeling assumptions that have a different approach to regulatory provisions. The Bank is currently not taking hedging actions against IRRBB.*

*The Bank determines the credit prepayment risk (CPR) model based on the longest historical data owned by the Bank. Determination of the CPR rate is done by comparing credit ceilings that have prepayment status with all credit ceilings held in historical data, whether those with accelerated repayment status, paid off status according to the due date, or those that are still active. Furthermore, the value of the CPR rate is obtained which is used as the initial assumption that there is potential for credit whose repayment will be accelerated in calculating the IRRBB cash flow projection.*

*The Bank determines the term deposit redemption Ratio (TDRR) model based on the longest historical data owned by the Bank. The TDRR rate is determined by comparing outstanding deposits with early redemption status with all outstanding deposits held in historical data, whether those with accelerated disbursement status, disbursement status according to the due date, or those that are still active. Then the TDRR rate value is obtained which is used as the initial assumption that there is a potential deposit whose disbursement will be accelerated in calculating the IRRBB cash flow projection.*

### Analisi Kualitatif

Bank membagi NMD menjadi 3 (tiga) berdasarkan aturan, yaitu transaksional, non-transaksional, dan korporasi (wholesale). Dimana pendekatan tersebut menggunakan asumsi simpanan stabil dan tidak stabil dari model perhitungan liquidity coverage ratio (LCR) untuk menentukan nominal transaksional dan non-transaksional. Kategori transaksional diasumsikan sebagai simpanan stabil sedangkan Kategori non-transaksional diasumsikan sebagai simpanan tidak stabil pada LCR. Untuk simpanan korporasi (wholesale) hanya dibedakan berdasarkan bidang usaha nasabah. Bank menentukan besarnya nilai core deposit untuk tabungan dan giro dengan asumsi core deposit yang digunakan adalah nilai nominal minimal pada tabungan dan giro selama kurun waktu data historis tersebut dan nilai minimal tersebut ditempatkan pada bucket repricing yang sesuai dengan kategori NMD. Selanjutnya apabila nominal tabungan dan giro pada saat tanggal pelaporan melebihi nilai minimal (core deposit) maka kelebihan tersebut dianggap sebagai non-core deposit yang akan ditempatkan pada bucket repricing overnight.

Bank perlu melakukan agregasi perhitungan  $\Delta EVE$  antar masing-masing mata uang agar diperoleh nilai konsolidasi dari seluruh mata uang yang menggambarkan kondisi Bank secara umum. Bank mengambil nilai agregasi yang akan digunakan untuk membobot (weighted) nilai perhitungan  $\Delta EVE$  pada mata uang valuta asing. Saat ini mata uang yang termasuk significant currency hanya mata uang rupiah dan USD.

### Qualitative Analysis

The Bank divides NMD into 3 (three) based on the rules, namely transactional, non-transactional, and corporate (wholesale). Where this approach uses the assumption of stable and unstable savings from the liquidity coverage ratio (LCR) calculation model to determine transactional and non-transactional nominal values. The transactional category is assumed to be a stable deposit while the non-transactional category is assumed to be an unstable deposit at LCR. Corporate deposits (wholesale) are only differentiated based on the customer's line of business. The bank determines the value of the core deposit for savings and current accounts with the assumption that the core deposit used is the minimum nominal value for savings and current accounts during the historical data period and this minimum value is placed in the repricing bucket according to the NMD category.

Banks need to perform an aggregation of  $\Delta EVE$  calculations between each currency in order to obtain a consolidated value of all currencies that describes the condition of the Bank in general. The Bank takes an aggregated value that will be used to weight (weighted) the calculation value of  $\Delta EVE$  in foreign currencies. Currently, the only currencies that include significant currency are the rupiah and USD.

### Analisi Kuantitatif

Bank mengikuti aturan dari regulator dengan menetapkan rata-rata jangka waktu penyesuaian suku bunga (repricing maturity) untuk NMD pada kisaran 5 Tahun untuk NMD transaksional, 4,5 Tahun untuk NMD non-transaksional, dan 4 Tahun untuk NMD korporasi.

### Quantitative Analysis

The Bank follows the rules of the regulator by setting an average repricing maturity period for NMD in the range of 5 years for transactional NMD, 4.5 years for non-transactional NMD, and 4 years for corporate NMD.

## Klasifikasi sebagai Liabilitas Lain-lain dalam Laporan Keuangan

Saham-saham preferen yang diterbitkan oleh PT Bank SBI Indonesia kepada Hana Bank diklasifikasikan dalam liabilitas lain-lain dalam laporan keuangan karena adanya hak dalam bentuk opsi jual yang memberikan pemegangnya, yaitu Hana Bank, hak untuk menjual saham yang dimilikinya, dengan kewajiban bagi State Bank of India sebagai pemegang saham mayoritas dari PT Bank SBI Indonesia untuk membeli saham opsi jual tersebut jika Hana Bank melaksanakan opsi jual tersebut dan pembeli tidak ditemukan dalam batas waktu yang tercantum dalam pemberitahuan terkait.

Pengklasifikasian ke dalam liabilitas lain-lain tersebut juga disebabkan oleh keadaan bahwa dividen yang menjadi hak Hana Bank bersifat kumulatif (dan dapat ditangguhkan jika bank mengalami kerugian), yang akan mengurangi porsi dividen yang berhak diterima oleh State Bank of India dalam keadaan normal.

Pengklasifikasian ke dalam liabilitas lain-lain tersebut sesuai dengan arahan dari kantor akuntan publik mengenai standar akuntansi yang berlaku.

Opini kami atas laporan keuangan tidak mencakup informasi lain, dan oleh karena itu, kami tidak menyatakan bentuk keyakinan apapun atas informasi lain tersebut.

Sehubungan dengan audit kami atas laporan keuangan terlampir, tanggung jawab kami adalah untuk membaca Laporan Tahunan yang teridentifikasi di atas, jika tersedia dan, dalam melaksanakannya, mempertimbangkan apakah Laporan Tahunan mengandung ketidakakuratan material dengan laporan keuangan terlampir atau pemahaman yang kami peroleh selama audit, atau mengandung kesalahan penyajian material.

Ketika kami membaca Laporan Tahunan, jika kami menyimpulkan bahwa terdapat suatu kesalahan penyajian material di dalamnya, kami diharuskan untuk mengomunikasikan hal tersebut kepada pihak yang bertanggung jawab atas tata kelola dan mengambil tindakan tepat berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia.

### **Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan**

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan, manajemen bertanggung jawab untuk menilai kemampuan Bank dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Bank atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Bank.

### **Other Information**

*Management is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditors' report thereon. The Annual Report is expected to be made available to us after the date of this auditors' report.*

*Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.*

*In connection with our audit of the accompanying financial statements, our responsibility is to read the Annual Report when it becomes available and, in doing so, consider whether the Annual Report is materially inconsistent with the accompanying financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.*

*When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants.*

### **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

*Management is responsible for the preparation and fair presentation of the financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.*

*In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.*

*Those charged with governance are responsible for overseeing the Bank's financial reporting process.*

### **Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan**

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Bank.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Bank untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Bank tidak dapat mempertahankan kelangsungan usaha.

### **Auditors' responsibilities for the Audit of the Financial Statements**

*Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.*

*As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:*

- *Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.*

**d. Financial Instruments**

**Financial Assets**

The Bank determines the classification of its financial assets at initial recognition. Classification and measurement of financial assets are based on business model and contractual cash flows - whether from solely payment of principal and interest.

Financial assets are classified in the categories as follows:

- Financial assets at amortized cost; and
- Financial assets at fair value through profit or loss ("FVTPL") or other comprehensive income ("FVOCI").

**Aset Keuangan (lanjutan)**

Pengukuran aset keuangan setelah pengakuan awal tergantung pada klasifikasinya sebagai berikut: (lanjutan)

- (i) Aset keuangan yang diukur dengan biaya diamortisasi (lanjutan)

Aset keuangan yang diukur dengan biaya diamortisasi selanjutnya diukur dengan menggunakan metode suku bunga efektif (*Effective Interest Rate*) ("*EIR*"), setelah dikurangi dengan penurunan nilai. Biaya perolehan yang diamortisasi dihitung dengan memperhitungkan diskonto atau premi atas biaya akuisisi atau biaya yang merupakan bagian integral dari *EIR* tersebut. Amortisasi *EIR* dicatat dalam laba rugi. Kerugian yang timbul dari penurunan nilai juga diakui pada laba rugi.

Kelompok aset keuangan ini meliputi kas, giro pada Bank Indonesia, giro pada bank lain dan institusi keuangan, penempatan pada Bank Indonesia dan bank lain, tagihan akseptasi, piutang bunga, kredit yang diberikan, aset lain-lain - setoran jaminan.

- (ii) Aset keuangan yang diukur pada nilai wajar melalui OCI

Instrumen utang

Bank mengukur instrumen utang pada nilai wajar melalui OCI jika kedua kondisi berikut terpenuhi: (1) aset keuangan yang dimiliki dalam model bisnis dengan tujuan untuk mengumpulkan arus kas kontraktual dan penjualan; dan (2) persyaratan kontraktual dari aset keuangan menimbulkan pada tanggal yang ditentukan untuk arus kas yang semata-mata pembayaran pokok dan bunga atas jumlah pokok yang belum dibayar.

Untuk instrumen utang yang diukur pada nilai wajar melalui OCI, pendapatan bunga, revaluasi selisih kurs, dan kerugian atau pembalikan penurunan nilai diakui dalam laba rugi dan dihitung dengan cara yang sama seperti aset keuangan yang diukur dengan biaya perolehan diamortisasi. Perubahan nilai wajar yang tersisa diakui dalam OCI. Setelah penghentian pengakuan, perubahan nilai wajar kumulatif yang diakui di OCI didaur ulang menjadi laba rugi.

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**d. Financial Instruments (continued)**

**Financial Assets (continued)**

The subsequent measurement of financial assets depends on their classification as follows: (continued)

- (i) Financial assets at amortized cost (continued)

Financial assets at amortized cost are subsequently measured using the *Effective Interest Rate* ("*EIR*") method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition fees or costs that are an integral part of the *EIR*. The *EIR* amortization is included in the profit or loss. The losses arising from impairment are also recognized in the profit or loss.

This group of financial assets include cash, current accounts with Bank Indonesia, current accounts with other banks and financial institution, placements with Bank Indonesia and other banks, acceptance receivables, interest receivables, loans and other assets - security deposits.

- (ii) Financial assets at fair value through OCI

Debt Instruments

The Bank measures debt instruments at fair value through OCI if both of the following conditions are met: (1) the financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and (2) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value change recognized in OCI is recycled to profit or loss.

Pengukuran aset keuangan setelah pengakuan awal tergantung pada klasifikasinya sebagai berikut: (lanjutan)

- (ii) Aset keuangan yang diukur pada nilai wajar melalui OCI (lanjutan)

Instrumen ekuitas

Setelah pengakuan awal, Bank dapat memilih untuk mengklasifikasikan investasi ekuitasnya secara tidak dapat dibatalkan sebagai instrumen ekuitas yang ditetapkan pada nilai wajar melalui OCI jika definisi ekuitas sesuai PSAK 232 (sebelumnya PSAK 50): Instrumen Keuangan: Penyajian dan tidak dimiliki untuk diperdagangkan. Klasifikasi ditentukan berdasarkan instrumen per instrumen.

Keuntungan dan kerugian dari aset keuangan ini tidak pernah didaur ulang menjadi laba atau rugi. Dividen diakui sebagai pendapatan lain-lain dalam laba rugi pada saat hak pembayaran telah ditetapkan, kecuali jika Bank memperoleh keuntungan dari hasil tersebut sebagai pemulihan sebagian biaya perolehan aset keuangan, dalam hal ini, keuntungan tersebut adalah dicatat dalam OCI. Instrumen ekuitas yang ditetapkan pada nilai wajar melalui OCI tidak tunduk pada penilaian penurunan nilai.

Derivatif, termasuk derivatif melekat yang dipisahkan, juga diklasifikasikan sebagai dimiliki untuk diperdagangkan kecuali jika ditetapkan sebagai instrumen lindung nilai yang efektif. Aset keuangan dengan arus kas yang tidak semata-mata pembayaran pokok dan bunga diklasifikasikan dan diukur pada nilai wajar melalui laba rugi, terlepas dari model bisnisnya.

**d. Financial Instruments (continued)**

**Financial Assets (continued)**

The subsequent measurement of financial assets depends on their classification as follows: (continued)

- (ii) Financial assets at fair value through OCI (continued)

Equity instruments

Upon initial recognition, the Bank can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under PSAK 232 (formerly PSAK 50): Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in profit or loss when the right of payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

This group of financial assets include marketable securities.

- (iii) Financial assets at fair value through profit or loss

Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model.

Terlepas dari kriteria untuk instrumen utang yang akan diklasifikasikan pada biaya perolehan diamortisasi atau pada nilai wajar melalui OCI, seperti dijelaskan di atas, instrumen utang dapat ditetapkan pada nilai wajar melalui laba rugi pada pengakuan awal jika hal tersebut menghilangkan, atau secara signifikan mengurangi, ketidaksesuaian akuntansi.

Aset keuangan yang diukur pada nilai wajar melalui laba rugi selanjutnya disajikan dalam laporan posisi keuangan sebesar nilai wajar, dengan perubahan nilai wajar yang diakui dalam laba rugi.

Kelompok aset keuangan ini meliputi efek-efek yang dibeli dengan janji untuk dijual kembali dan tagihan derivatif.

**Financial Assets (continued)**

(iii) Financial assets at fair value through profit or loss (continued)

Notwithstanding the criteria for debt instruments to be classified at amortized cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are subsequently carried in the statement of financial position at fair value, with changes in fair value recognized in profit or loss.

This group of financial assets include securities purchased under resale agreements and derivative receivables.

**Financial Liabilities**

Financial liabilities within the scope of PSAK 109 (formerly PSAK 71) are classified as follows:

The subsequent measurement of financial liabilities depends on their classification as follows:

- (i) Financial liabilities at amortized cost

Financial liabilities at amortized cost (e.g interestbearing loans and borrowings) are subsequently measured using the *EIR* method. The *EIR* amortization is included in finance costs in the profit or loss.

The financial liabilities in this category include liabilities due payable immediately, deposits from customers, deposits from other banks, acceptance payables, interest payables and other liabilities.

- (ii) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition at fair value through the profit or loss.

Financial liabilities are classified as held-for-trading if they are acquired for the purpose of selling or repurchasing in the near term. This category includes derivative financial instruments entered into by the Bank that are not designated as hedging instruments in hedge relationships as defined by PSAK 109 (formerly PSAK 71). Separated embedded derivatives are also classified as held-for-trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held-for-trading are recognized in the profit or loss.

Financial liabilities in this category includes derivative liabilities.

A financial liability is derecognized when the obligation under the liability is discharged or canceled or has expired.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the profit or loss.

**d. Instrumen Keuangan (lanjutan)**

**Instrumen Derivatif**

Metode pengakuan keuntungan atau kerugian yang timbul tergantung dari apakah derivatif tersebut dimaksudkan sebagai instrumen lindung nilai, dan jika demikian, sifat dari item yang dilindungi nilai.

Untuk derivatif yang dikategorikan sebagai lindung nilai arus kas, pada awal transaksi, Bank mendokumentasikan hubungan antara instrumen lindung nilai dengan item yang dilindungi nilai, beserta tujuan manajemen risiko dan strategi pelaksanaan transaksi lindung nilai. Bank juga mendokumentasikan penilaiannya, pada saat dimulainya lindung nilai dan secara berkesinambungan, apakah derivatif yang digunakan dalam transaksi lindung nilai sangat efektif dalam menghapus dampak perubahan nilai wajar atas arus kas yang dilindungi nilai.

Nilai wajar penuh derivatif lindung nilai diklasifikasikan sebagai aset tidak lancar atau liabilitas jangka panjang jika jatuh tempo yang tersisa untuk pokok yang dilindungi nilai melebihi 12 bulan, dan sebagai aset lancar atau liabilitas jangka pendek jika jatuh tempo yang tersisa kurang dari 12 bulan.

Perubahan nilai wajar derivatif yang ditetapkan dan memenuhi kriteria lindung nilai atas arus kas untuk tujuan akuntansi, bagian efektifnya, diakui di penghasilan komprehensif lain di dalam "cadangan lindung nilai arus kas". Ketika instrumen derivatif tersebut kadaluarsa atau tidak lagi memenuhi kriteria lindung nilai untuk tujuan akuntansi, maka keuntungan atau kerugian kumulatif di penghasilan komprehensif lain diakui pada laba rugi.

Perubahan nilai wajar derivatif yang tidak memenuhi kriteria lindung nilai untuk tujuan akuntansi diakui pada laba rugi.

**Pengakuan Pendapatan dan Beban**

Pendapatan dan beban bunga atas aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain serta aset keuangan dan liabilitas keuangan yang dicatat berdasarkan biaya perolehan diamortisasi, diakui pada laporan laba rugi dengan menggunakan metode suku bunga efektif.

Jumlah tercatat bruto aset keuangan adalah biaya perolehan diamortisasi aset keuangan sebelum disesuaikan dengan cadangan penurunan nilai.

Dalam menghitung pendapatan dan beban bunga, tingkat bunga efektif diterapkan pada jumlah tercatat bruto aset (ketika aset tersebut bukan aset keuangan memburuk) atau terhadap biaya perolehan diamortisasi dari liabilitas.

**POLICIES (continued)**

**d. Financial Instruments (continued)**

**Derivative Instruments**

The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

For derivatives that are designated as a cash flow hedge, at the inception of the transaction, the Bank documents the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Bank also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in the cash flows of hedged items.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

Changes in the fair value of derivatives that are designated and qualify as cash flow hedges for accounting purposes and that are effective, are recognized in other comprehensive income within "cash flows hedging reserve". When a hedging instrument expires, or when a hedge no longer meets the criteria for hedge accounting, the cumulative gain or loss in other comprehensive income is recognized in the profit or loss.

Changes in the fair value of derivatives that do not meet the criteria of hedging for accounting purposes are recorded immediately in the profit or loss.

**Income and Expense Recognition**

Interest income and expense on financial assets measured at fair value through other comprehensive income as well as financial assets and financial liabilities recorded at amortized cost are recognized in the statement of profit or loss using the effective interest rate method.

The gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for allowance for impairment.

In calculating interest income and expenses, the effective interest rate is applied to the gross carrying amount of an asset (when the asset is not an impaired financial asset) or to the amortized cost of a liability.

Pada saat aset keuangan dihentikan pengakuannya atau dilakukan penurunan nilai, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam ekuitas harus diakui pada laba rugi.

**Saling Hapus Antar Aset dan Liabilitas Keuangan**

Aset dan liabilitas keuangan dapat saling hapus dan nilai bersihnya disajikan dalam laporan posisi keuangan jika, dan hanya jika, Bank saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut dan berniat untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

**Penurunan Nilai Aset Keuangan**

Persyaratan penurunan nilai PSAK 109 (sebelumnya PSAK 71) menggunakan lebih banyak informasi *forward-looking* untuk mengakui kerugian kredit ekspektasian “cadangan kerugian kredit ekspektasian (“ECL”)”.

Pengakuan kerugian kredit tidak lagi bergantung pada Bank saat pertama kali mengidentifikasi peristiwa kerugian kredit. Sebaliknya, Bank mempertimbangkan berbagai informasi yang lebih luas ketika menilai risiko kredit dan mengukur kerugian kredit ekspektasian, termasuk peristiwa masa lalu, kondisi saat ini, prakiraan yang wajar dan dapat didukung yang memengaruhi kolektibilitas yang diharapkan dari arus kas masa depan dari instrumen tersebut.

Faktor pengukuran risiko kredit mengacu pada ketentuan Basel II yaitu *Probability of Default* (“PD”), *Loss Given Default* (“LGD”), dan *Exposure at Default* (“EAD”). Pengukuran risiko kredit ini merupakan estimasi berdasarkan pengalaman historis dengan mempertimbangkan faktor makro ekonomi sebagai komponen *forward-looking*.

**Income and Expense Recognition (continued)**

Gains and losses arising from changes in the fair value of financial assets that classified as fair value through other comprehensive income are recognized directly in other comprehensive income (as part of equity), until the financial asset is derecognized or impaired, except gain or loss arising from changes in exchange rate for debt instruments.

When a financial asset is derecognized or impaired, the cumulative gains or losses previously recognized in equity are recognized in profit or loss.

**Offsetting Financial Assets and Financial Liabilities**

Financial assets and liabilities are offset and the net amount is presented in the statement of financial position if, and only if, the Bank has currently enforceable legal right to offset the recognized amounts and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

**Impairment of Financial Assets**

PSAK 109 (formerly PSAK 71) impairment requirements use more forward-looking information to recognize expected credit losses - the “expected credit loss (“ECL”) model”.

Recognition of credit losses is no longer dependent on the Bank first identifying a credit loss event. Instead the Bank considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

Credit risk measurement factors refer to Basel II provisions, *Probability of Default* (“PD”), *Loss Given Default* (“LGD”), and *Exposure at Default* (“EAD”). This credit risk measurement is an estimate based on historical experience by considering macroeconomic factors as a component of forward-looking.

**Penurunan Nilai Aset Keuangan (lanjutan)**

Dalam menerapkan perhitungan cadangan kerugian kredit ekspektasian ("ECL") dengan pendekatan *forward-looking* ini, perbedaan dibuat antara:

- a. instrumen keuangan yang tidak mengalami penurunan kualitas kredit secara signifikan sejak pengakuan awal atau yang memiliki risiko kredit rendah ("Tahap 1"), maka Bank membukukan cadangan ECL untuk 12 bulan sejak hari pengakuan awal dan untuk periode selanjutnya, Bank terus memonitor apakah terdapat peningkatan risiko kredit yang signifikan dari pengakuan awal;
- b. instrumen keuangan yang kualitas kreditnya menurun secara signifikan sejak pengakuan awal dan yang risiko kreditnya tidak rendah ("Tahap 2"), maka pencadangan dibukukan berdasarkan ECL sepanjang umur eksposur. Jika terdapat perbaikan yang signifikan pada kualitas kredit, eksposur akan pindah kembali ke Tahap 1;
- c. "Tahap 3" akan mencakup aset keuangan yang memiliki bukti objektif penurunan nilai pada tanggal pelaporan. Contohnya adalah wanprestasi/gagal bayar yang teridentifikasi sejak pengakuan awal. Cadangan penurunan nilai pada Tahap 3 didasarkan pada ECL sepanjang umur eksposur. Eksposur yang dapat dipulihkan akan pindah ke Tahap 2 atau Tahap 1;
- d. aset keuangan yang memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara jumlah tercatat bruto dan nilai kini arus kas masa depan yang diestimasi;
- e. komitmen pinjaman yang belum ditarik, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini jumlah arus kas jika komitmen ditarik dan arus kas yang diperkirakan akan diterima oleh Bank.

Faktor utama dalam menentukan apakah aset keuangan memerlukan ECL 12 bulan (*Stage 1*) atau ECL *lifetime* (*Stage 2*) disebut dengan kriteria peningkatan signifikan dalam risiko kredit (*Significant Increase on Credit Risk*/"SICR"). Penentuan kriteria SICR memerlukan pengkajian apakah telah terjadi peningkatan risiko kredit yang signifikan pada setiap tanggal pelaporan.

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**d. Financial Instruments (continued)**

**Impairment of Financial Assets (continued)**

In applying this calculation of expected credit loss ("ECL") reserves with this forward-looking approach, a distinction is made between:

- a. financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ("Stage 1"), therefore Bank records ECL reserves for 12 months from the day of initial recognition and for the next period, Bank continues to monitor whether there is a significant increase in credit risk from initial recognition;
- b. financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ("Stage 2"), therefore reserves are posted on the ECL basis throughout the lifetime of the exposure. If there is a significant improvement in credit quality, the exposure will move back to Stage 1;
- c. "Stage 3" would cover financial assets that have objective evidence of impairment at the reporting date. For example, nonperformance of contract/default identified from initial recognition. Allowance for impairment on Stage 3 is based on ECL for the life time of exposure. Recoverable exposures will move to Stage 2 or Stage 1;
- d. financial assets that deteriorate at the reporting date, the expected credit loss is measured at the difference between the gross carrying amount and the present value of estimated future cash flows;
- e. for undisbursed loan commitments, expected credit losses are measured at the difference between the present value of the amount of cash flow if the commitments is withdrawn and the cash flow expected to be received by the Bank.

The main factor in determining whether the financial assets need 12-month ECL (*Stage 1*) or lifetime ECL (*Stage 2*) is Significant Increase on Credit Risk ("SICR") criteria. Determinations of SICR criteria needs review whether significant increase in credit risk occurred at each reporting date.

Aset Keuangan yang Direstrukturisasi

Jika ketentuan aset keuangan dinegosiasikan ulang atau dimodifikasi atau aset keuangan yang ada diganti dengan yang baru karena kesulitan keuangan peminjam, maka dilakukan penilaian apakah aset keuangan yang ada harus dihentikan pengakuannya dan kerugian kredit ekspektasian diukur sebagai berikut:

- a. Apabila syarat-syarat tersebut berbeda secara substansial, Bank menghentikan pengakuan aset keuangan awal dan mengakui aset keuangan yang 'baru' pada nilai wajarnya dan menghitung kembali suku bunga efektif yang baru untuk aset tersebut. Tanggal renegotiasi syarat pinjaman dianggap sebagai tanggal pengakuan awal untuk keperluan perhitungan penurunan nilai, termasuk untuk menentukan apakah terdapat kenaikan signifikan risiko kredit. Namun, Bank juga menilai apakah aset keuangan baru dianggap sebagai aset keuangan yang mengalami penurunan nilai pada pengakuan awal, terutama dalam keadaan dimana renegotiasi didorong oleh peminjam yang tidak dapat melakukan pembayaran yang sudah disetujui sebelumnya. Selisih dari nilai tercatat juga diakui pada laporan laba rugi di pembentukan cadangan kerugian penurunan nilai sebagai laba rugi dari penghentian pengakuan aset keuangan. Untuk Bank, bila kerugian berelasi dengan risiko kredit, Bank mengklasifikasikan kerugian kedalam pembentukan cadangan kerugian penurunan nilai.
- b. Apabila syarat-syarat tersebut tidak berbeda secara substansial, renegotiasi atau modifikasi tidak menghasilkan penghentian pengakuan, dan Bank menghitung kembali nilai tercatat bruto berdasarkan arus kas yang sudah dimodifikasi dari aset keuangan dan mengakui laba atau rugi modifikasian di laporan laba rugi. Nilai tercatat bruto yang baru dihitung kembali dengan mendiskontokan arus kas yang telah dimodifikasi dengan menggunakan tingkat suku bunga efektif awal.

Aset Keuangan yang Memburuk

Pada setiap tanggal pelaporan, Bank menilai apakah aset keuangan yang dicatat pada biaya perolehan diamortisasi dan aset keuangan instrumen utang yang dicatat pada nilai wajar melalui penghasilan komprehensif lain mengalami penurunan nilai kredit (memburuk). Aset keuangan memburuk ketika satu atau lebih peristiwa yang memiliki dampak merugikan atas estimasi arus kas masa depan dari aset keuangan telah terjadi.

Restructured Financial Assets

If the terms of the financial assets are renegotiated or modified or the existing financial assets are replaced with new ones due to the borrower's financial difficulties, an assessment is made whether recognition of existing financial assets must be derecognized and expected credit losses measured as follows:

- a. If the terms are substantially different, the Bank derecognises the original financial asset and recognizes a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Bank also assesses whether the new financial asset recognized is deemed to be creditimpaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in the statement of profit or loss in allowance for impairment losses as a gain or loss on derecognition. For the Bank, to the extent that the loss does relate to credit risk, the Bank classifies that loss within allowance for impairment losses.
- b. If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Bank recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognizes a modification gain or loss in statements of profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate.

Credit-impaired Financial Assets

At each reporting date, the Bank assesses whether the financial assets recorded at amortized cost and the debt instrument financial assets which are recorded at fair value through other comprehensive income are credit impaired (worsening). Financial assets deteriorate when one or more events that have an adverse effect on the estimated future cash flows of the financial assets have occurred.

Aset Keuangan yang Memburuk (lanjutan)

Bukti bahwa aset keuangan mengalami penurunan nilai kredit (memburuk) termasuk data yang dapat diobservasi mengenai peristiwa berikut ini:

- kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
- pelanggaran kontrak, seperti peristiwa gagal bayar atau peristiwa tunggakan;
- pihak pemberi pinjaman, untuk alasan ekonomi atau kontraktual sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, telah memberikan konsesi pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;
- terjadi kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya; atau
- hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan;
- Pembelian atau penerbitan aset keuangan dengan diskon sangat besar yang mencerminkan kerugian kredit yang terjadi.

Kerugian kredit adalah selisih antara seluruh arus kas kontraktual yang jatuh tempo kepada entitas sesuai dengan kontrak dan seluruh arus kas yang diperkirakan diterima entitas (yaitu seluruh kekurangan kas), didiskontokan dengan suku bunga efektif awal (atau suku bunga efektif yang disesuaikan dengan kredit untuk aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk). Bank mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dari instrumen keuangan (sebagai contoh, percepatan pelunasan, perpanjangan, opsi beli dan opsi-serupa) selama perkiraan umur dari instrumen keuangan tersebut. Arus kas yang dipertimbangkan termasuk arus kas dari penjualan agunan yang dimiliki atau peningkatan kredit lainnya yang merupakan bagian yang tidak terpisahkan dari persyaratan kontraktual.

Terdapat praduga bahwa perkiraan umur dari instrumen keuangan dapat diestimasi dengan andal. Akan tetapi, dalam kasus yang jarang terjadi, apabila tidak mungkin untuk mengestimasi perkiraan umur instrumen keuangan dengan andal, entitas menggunakan sisa persyaratan kontraktual dari instrumen keuangan.

Kerugian kredit ekspektasian adalah rata-rata tertimbang atas kerugian kredit dengan masing-masing terjadinya risiko gagal bayar sebagai pembobotan.

Kerugian kredit ekspektasian 12 bulan adalah bagian dari kerugian kredit ekspektasian sepanjang umurnya merepresentasikan kerugian kredit ekspektasian yang timbul dari peristiwa gagal bayar instrumen keuangan yang mungkin terjadi dalam 12 bulan setelah tanggal pelaporan.

**Impairment of Financial Assets (continued)**

Credit-impaired Financial Assets (continued)

Evidence that financial assets become credit impaired (worsening) including observable data regarding the following events:

- significant financial difficulties experienced by the issuer or the borrower;
- breach of contract, such as a default or arrears;
- the lender, for economic or contractual reasons in relation to the financial difficulties experienced by the borrower, has given concessions to the borrower which is not possible if the borrower does not experience such difficulties;
- it is probable that the borrower will enter bankruptcy or the other financial reorganization; or
- loss of an active market for financial assets due to financial difficulties;
- Purchase or issuance of financial asset at significant discount which reflect the credit loss that occurs.

Credit loss is the difference between all contractual cash flows that are due to an entity in accordance with the contract and all the cash flows that the entity expects to receive (ie all cash shortfalls), discounted at the original effective interest rate (or credit adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Bank shall estimate cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument. The cash flows that are considered shall include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

There is a presumption that the expected life of a financial instrument can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the expected life of a financial instrument, the entity shall use the remaining contractual term of the financial instrument.

Expected credit losses are the weighted average of credit losses with the respective risks of a default occurring as the weights.

The 12-month expected credit losses are the portion of lifetime expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

**Penurunan Nilai Aset Keuangan (lanjutan)**

Kerugian kredit ekspektasian sepanjang umurnya adalah kerugian kredit ekspektasian yang dihasilkan dari seluruh kemungkinan peristiwa gagal bayar selama perkiraan umur dari instrumen keuangan.

Pengukuran kerugian kredit ekspektasian ditentukan oleh estimasi probabilitas tertimbang kerugian kredit selama perkiraan umur instrumen keuangan.

**e. Penentuan Nilai Wajar**

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar di pasar utama (atau pasar yang paling menguntungkan) pada tanggal pengukuran dalam kondisi pasar saat ini (yaitu harga keluar) terlepas apakah harga tersebut dapat diobservasi secara langsung atau diestimasi dengan menggunakan teknik penilaian lain pada tanggal pengukuran.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- (a) di pasar utama (*principal market*) untuk aset atau liabilitas tersebut; atau
- (b) jika tidak terdapat pasar utama, di pasar yang paling menguntungkan (*most advantageous market*) untuk aset atau liabilitas tersebut.

Bank mengukur nilai wajar suatu aset atau liabilitas menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset atau liabilitas tersebut, dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomis terbaiknya.

Pengukuran nilai wajar aset nonkeuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomis dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya (*highest and best use*) atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Bank menggunakan teknik penilaian yang sesuai dalam keadaan dan dimana data yang memadai tersedia untuk mengukur nilai wajar, memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

*Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal (or most advantageous market) at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique at the measurement date.*

*The Bank measures the fair value of an asset or a liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.*

*A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.*

**e. Penentuan Nilai Wajar (lanjutan)**

Hierarki nilai wajar dikategorikan dalam 3 (tiga) level input untuk teknik penilaian yang digunakan dalam pengukuran nilai wajar, sebagai berikut:

- (a) Input Level 1 - harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses entitas pada tanggal pengukuran.
- (b) Input Level 2 - input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung atau tidak langsung.
- (c) Input Level 3 - input yang tidak dapat diobservasi untuk aset atau liabilitas.

Untuk aset dan liabilitas yang diakui pada laporan keuangan secara berulang, Bank menentukan apakah terjadi transfer antara Level di dalam hierarki dengan cara mengevaluasi kategori (berdasarkan input level terendah yang signifikan dalam pengukuran nilai wajar) setiap akhir periode pelaporan.

Bank menentukan kelas aset dan liabilitas yang sesuai dengan sifat, karakteristik, dan risiko aset dan liabilitas, dan level hierarki nilai wajar dimana pengukuran nilai wajar tersebut dikategorikan.

**f. Kas**

Kas adalah mata uang kertas dan logam baik Rupiah dan mata uang asing yang masih berlaku sebagai alat pembayaran yang sah.

Tidak terdapat kas yang digunakan sebagai jaminan atau dibatasi penggunaannya.

**g. Giro pada Bank Indonesia dan Bank Lain**

Giro pada Bank Indonesia dan bank lain dinyatakan sebesar saldo Giro dikurangi cadangan kerugian penurunan nilai. Giro pada Bank Indonesia dan bank lain diklasifikasikan sebagai biaya perolehan yang diamortisasi.

Pengakuan, pengukuran awal, pengukuran setelah pengakuan awal, penurunan nilai dan penghentian pengakuan Giro pada Bank Indonesia dan bank lain mengacu pada Catatan 3d terkait aset keuangan.

**e. Estimation of Fair Value (continued)**

Fair value hierarchy are categorized into 3 (three) levels the inputs to valuation techniques used to measure fair value, as follows:

- (a) Level 1 inputs - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- (b) Level 2 inputs - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- (c) Level 3 inputs - unobservable inputs for the asset or liability.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Bank determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Bank determines appropriate classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability, and the level of the fair value hierarchy within which the fair value measurement is categorized.

Cash represents currency bills and coins, both in Rupiah and foreign currencies, which are valid as legal instruments of payment.

Selisih antara harga beli dan harga jual kembali diperlakukan sebagai pendapatan bunga yang ditangguhkan, dan diakui sebagai pendapatan selama periode sejak efek-efek tersebut dibeli hingga dijual menggunakan suku bunga efektif.

Pengakuan, pengukuran awal, pengukuran setelah pengakuan awal, penurunan nilai dan penghentian pengakuan efek-efek yang dibeli dengan janji dijual kembali mengacu pada Catatan 3d terkait aset keuangan.

**k. Kredit yang Diberikan**

Kredit yang diberikan pada awalnya diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung dan biaya tambahan untuk memperoleh aset keuangan tersebut. Setelah pengakuan awal kredit yang diberikan diukur pada biaya perolehan diamortisasimenggunakan metode suku bunga efektif dikurangi dengan cadangan kerugian penurunan nilai. Kredit yang diberikan diklasifikasikan sebagai biaya perolehan diamortisasi.

Pengakuan, pengukuran awal, pengukuran setelah pengakuan awal, penurunan nilai dan penghentian pengakuan kredit yang diberikan mengacu pada Catatan 3d terkait aset keuangan.

Kredit yang diberikan dihapusbukukan pada saat manajemen berpendapat bahwa kredit tersebut tidak dapat tertagih lagi. Kredit yang tidak dapat dilunasi dihapusbukukan dengan mendebit penyisihan kerugian penurunan nilai. Penerimaan kemudian atas kredit yang diberikan yang telah dihapusbukukan pada tahun berjalan, dikreditkan dengan menyesuaikan pada akun cadangan. Penerimaan kembali atas kredit yang diberikan yang telah dihapusbukukan pada tahun sebelumnya dicatat sebagai pendapatan operasional lainnya.

Restrukturisasi kredit meliputi adanya perpanjangan jangka waktu pembayaran dan ketentuan kredit yang baru. Setelah syarat dan ketentuan telah dinegosiasi ulang, penurunan nilai yang ada sebelumnya akan diukur dengan menggunakan EIR awal sebelum ketentuan kredit dimodifikasi dan kredit tersebut tidak lagi dalam kategori "past-due". Manajemen akan melakukan kaji ulang pada kredit yang direstrukturisasi secara berkelanjutan untuk memastikan bahwa seluruh syarat terpenuhi dan pembayaran di masa datang akan terjadi. Kredit tersebut akan dimasukkan dalam perhitungan penurunan nilai secara individual atau kolektif, yang dihitung dengan menggunakan suku bunga efektif ("EIR") awal, dan mengikuti perlakuan atas perhitungan penurunan nilai kreditnya.

**l. Penurunan Nilai Aset Nonkeuangan**

Bank menilai pada tiap tanggal pelaporan apakah terdapat indikasi penurunan nilai pada aset. Apabila terdapat indikasi penurunan nilai, atau ketika penilaian penurunan nilai bagi aset secara tahunan disyaratkan, Bank membuat estimasi nilai terpulihkan aset.

Aset yang diamortisasi ditelaah untuk penurunan nilai apabila terjadi kondisi atau perubahan yang mengindikasikan bahwa jumlah tercatat aset tidak dapat diperoleh kembali. Kerugian penurunan nilai diakui sebesar selisih jumlah tercatat aset terhadap jumlah terpulihkannya. Jumlah terpulihkan adalah jumlah yang lebih tinggi antara nilai wajar aset dikurangi biaya penjualan dengan nilai pakai.

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**k. Loans**

Loans are initially measured at fair value plus transaction costs that are directly attributable to obtaining the financial asset. After initial recognition, loans are measured at amortized cost using the effective interest method, net off allowance for impairment losses. Loans are classified as amortized cost.

Recognition, initial measurement, subsequent measurement, impairment and derecognition of loans are referred to in Note 3d regarding financial assets.

Loans deemed uncollectible are charged to the allowance. Recoveries on loans previously charged off are credited to the allowance at their principal amount. Subsequent recoveries of loans previously written off in the current year is credited to the allowance account. Recoveries of loans written off in previous years are recorded as other operating income.

Loan restructuring may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any previous impairment is measured using the original EIR as calculated before the modification of terms and the loan is no longer considered "past-due". Management continuously reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original EIR and impairment assessment of loans.

**l. Impairment of Non-financial Assets**

The Bank assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment assessment for an asset is required, the Bank makes an estimate of the asset's recoverable amount.

Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

**l. Penurunan Nilai Aset Nonkeuangan (lanjutan)**

Untuk tujuan menguji penurunan nilai, aset dikelompokkan hingga unit terkecil yang menghasilkan arus kas terpisah teridentifikasi (unit penghasil kas). Aset nonkeuangan yang mengalami penurunan nilai ditelaah untuk kemungkinan pembalikan atas penurunan nilai tersebut pada setiap tanggal pelaporan.

**m. Aset Tetap**

Bank telah memilih untuk menggunakan biaya sebagai kebijakan akuntansi pengukuran aset tetapnya.

Aset tetap awalnya dinyatakan sebesar biaya perolehan. Biaya perolehan aset terdiri harga pembelian dan biaya lainnya yang dapat diatribusikan secara langsung untuk membawa aset ke kondisi kerja dan lokasi untuk digunakan. Setelah pengakuan awal, aset tetap, diukur pada biaya dikurangi akumulasi penyusutan dan akumulasi kerugian penurunan nilai. Tanah dinyatakan sebesar biaya perolehan dan tidak disusutkan.

Sesuai dengan ISAK 336 (sebelumnya ISAK 36), Bank menganalisa fakta dan keadaan untuk masing-masing jenis hak atas tanah dalam bentuk Hak Guna Usaha ("HGU"), Hak Guna Bangunan ("HGB") dan Hak Pakai ("HP") dalam menentukan akuntansi untuk masing-masing hak atas tanah tersebut sehingga dapat merepresentasikan dengan tepat suatu kejadian atau transaksi ekonomik yang mendasarinya. Jika hak atas tanah tersebut tidak mengalihkan pengendalian atas aset pendasar kepada Bank, melainkan mengalihkan hak untuk menggunakan aset pendasar, Bank menerapkan perlakuan akuntansi atas transaksi tersebut sebagai sewa berdasarkan PSAK 116 (sebelumnya PSAK 73), "Sewa". Jika hak atas tanah secara substansi menyerupai pembelian tanah, maka Bank menerapkan PSAK 216 (sebelumnya PSAK 16) "Aset tetap".

Aset tetap dinyatakan sebesar biaya perolehan, kecuali tanah, dikurangi akumulasi penyusutan dan rugi penurunan nilai. Penyusutan dihitung dengan menggunakan metode garis lurus (*straight-line method*) selama umur manfaat aset. Taksiran masa manfaat ekonomis sebagai berikut:

|                  | <u>Tahun / Years</u> |                  |
|------------------|----------------------|------------------|
| Bangunan         | 20                   | Buildings        |
| Kendaraan        | 5                    | Vehicles         |
| Peralatan kantor | 3-5                  | Office equipment |

Pada setiap akhir tahun buku, manajemen mengkaji ulang nilai residu, umur manfaat dan metode penyusutan, dan jika sesuai dengan keadaan, disesuaikan secara prospektif.

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**l. Impairment of Non-financial Assets (continued)**

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

**m. Fixed Assets**

The Bank has chosen the cost model as the accounting policy for its fixed assets measurement.

Fixed assets are initially recorded at cost. The cost of an asset comprises its purchases price and any directly attributable cost of bringing the asset to its working condition and location for its intended use. Subsequent to initial recognition, fixed assets are measured at cost less accumulated depreciation and any accumulated impairment losses. Land is declared to be equal to the acquisition cost and not depreciated.

In accordance with ISAK 336 (formerly ISAK 36), the Bank analyzes the facts and circumstances for each type of land rights in the form of Business Usage Rights (Hak Guna Usaha or "HGU"), Building Usage Rights (Hak Guna Bangunan or "HGB") and Usage Rights (Hak Pakai or "HP") in determining the accounting for each of these land rights so that it can accurately represent an underlying economic event or transaction. If the land rights do not transfer control of the underlying assets to the Bank, but gives the rights to use the underlying assets, the Bank applies the accounting treatment of these transactions as leases under PSAK 116 (formerly PSAK 73), "Lease". If land rights are substantially similar to land purchases, the Bank applies PSAK 216 (formerly PSAK 16) "Fixed Assets".

Fixed assets are stated at cost, except land, less accumulated depreciation and impairment losses. Depreciation is computed using the straight-line method over the useful life of the assets. Estimated useful lives as follows:

At the end of each financial year, management reviewed the residual values, useful lives and methods of depreciation, and if appropriate, adjusted prospectively.

Jumlah tercatat aset diturunkan menjadi sebesar nilai yang dapat diperoleh kembali jika jumlah tercatat aset lebih besar dari jumlah yang dapat terpulihkan tersebut.

Suatu aset tetap dihentikan pengakuannya pada saat dilepaskan atau tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset tetap (dihitung sebagai perbedaan antara jumlah neto hasil pelepasan dan jumlah tercatat dari aset tetap) diakui dalam laba rugi pada tahun aset tersebut itu dihentikan pengakuannya.

**n. Aset Lain-Lain**

Aset lain-lain antara lain terdiri dari agunan yang diambil alih, aset yang tidak digunakan (properti terbungkalai), perlengkapan kantor, setoran jaminan dan lain-lain.

Agunan yang diambil alih (AYDA) adalah aset yang diperoleh oleh Bank, baik melalui pelelangan maupun diluar pelelangan berdasarkan penyerahan secara sukarela oleh pemilik agunan atau berdasarkan kuasa untuk menjual diluar lelang dari pemilik agunan dalam hal debitur tidak memenuhi liabilitasnya kepada Bank. AYDA merupakan jaminan kredit yang diberikan yang telah diambil alih sebagai bagian dari penyelesaian kredit yang diberikan dan disajikan pada "Aset lain-lain".

AYDA dan aset yang tidak digunakan disajikan sebesar nilai bersih yang dapat direalisasi (*net realizable value*). Nilai bersih yang dapat direalisasi adalah nilai wajar agunan yang diambil alih dikurangi dengan estimasi biaya untuk menjual AYDA tersebut.

Kelebihan saldo kredit yang diberikan yang belum dilunasi oleh debitur diatas nilai dari AYDA, dibebankan terhadap cadangan kerugian penurunan nilai kredit yang diberikan, antara nilai bersih yang dapat direalisasi dengan hasil penjualan AYDA diakui sebagai keuntungan atau kerugian pada tahun berjalan pada saat dijual dan dicatat dalam laporan laba rugi dan penghasilan komprehensif lain.

AYDA yang tidak digunakan tidak disusutkan. Beban-belan yang berkaitan dengan pemeliharaan AYDA dan aset yang tidak digunakan dibebankan ke laporan laba rugi dan penghasilan komprehensif lain tahun berjalan pada saat terjadinya. Manajemen mengevaluasi nilai AYDA secara berkala. Bila terjadi penurunan nilai yang bersifat permanen, maka nilai tercatatnya dikurangi untuk mengakui penurunan tersebut dan kerugiannya dibebankan pada laporan laba rugi dan penghasilan komprehensif lain tahun berjalan.

**m. Fixed Assets (continued)**

*An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.*

*An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from derecognition of the fixed asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is recognized in profit or loss in the year the item it is derecognized.*

**n. Other Assets**

*Other assets include foreclosed assets, abandoned properties, office supplies, security deposits and others.*

*Foreclosed assets represent assets acquired by the Bank, both from auction and non-auction based on voluntary transfer by the debtor or based on debtor's approval to sell the collateral where the debtor could not fulfil their obligations to the Bank. Foreclosed assets represent loan collateral that were taken over as part of loans settlement and presented in "Other Assets".*

*Foreclosed assets and abandoned properties are presented at their net realizable value. Net realizable value is the fair value of the foreclosed assets less estimated costs of liquidating the foreclosed assets.*

*Any excess of the loan balance over the value of the foreclosed assets, which is not recoverable from the borrower, is charged to the allowance for impairment losses. Differences between the estimated realizable value and the proceeds from disposal of the foreclosed assets are recognized as current year's gain or loss at the date of disposal and recorded in the statement of profit or loss and other comprehensive income.*

*Foreclosed assets are not depreciated. Expenses for maintaining foreclosed assets and abandoned properties are recognized in the current year's statement of profit or loss and other comprehensive income. **o. Sewa**

Bank sebagai penyewa

Pada insepisi kontrak, Bank menilai apakah kontrak adalah, atau mengandung, sewa. Suatu kontrak adalah atau mengandung sewa jika kontrak tersebut memberikan hak untuk mengendalikan penggunaan aset yang identifikasian selama suatu jangka waktu waktu untuk dipertukarkan dengan imbalan.

Untuk menilai apakah kontrak memberikan hak untuk mengendalikan penggunaan aset identifikasian, Bank menilai apakah:

- Bank memiliki hak untuk mendapatkan secara substansial seluruh manfaat ekonomi dari penggunaan aset identifikasian; dan
- Bank memiliki hak untuk mengarahkan penggunaan aset identifikasian. Bank memiliki hak ini ketika Bank memiliki hak untuk pengambilan keputusan yang relevan tentang bagaimana dan untuk tujuan apa aset digunakan telah ditentukan sebelumnya dan:

1. Bank memiliki hak untuk mengoperasikan aset;
2. Bank telah mendesain aset dengan cara menetapkan sebelumnya bagaimana dan untuk tujuan apa aset akan digunakan selama periode penggunaan.

Pada tanggal insepisi atau pada penilaian kembali atas kontrak yang mengandung sebuah komponen sewa, Bank mengalokasikan imbalan dalam kontrak ke masing-masing komponen sewa berdasarkan harga tersendiri relatif dari komponen sewa dan harga tersendiri agregat dari komponen nonsewa. Namun, untuk sewa penunjang dimana Bank bertindak sebagai penyewa, Bank memutuskan untuk tidak memisahkan komponen nonsewa dan mencatat komponen sewa dan nonsewa tersebut sebagai satu komponen sewa.

Pada saat permulaan sewa, penyewa mengakui aset hak-guna dan liabilitas sewa. Aset hak-guna awalnya diukur pada harga perolehan, yang terdiri dari jumlah awal liabilitas sewa yang disesuaikan dengan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan, ditambah biaya langsung awal yang timbul dan estimasi biaya untuk membongkar dan memindahkan aset pendasar atau merestorasi aset pendasar ke kondisi yang disyaratkan oleh syarat dan ketentuan sewa, dikurangi insentif sewa yang diterima.

**o. Leases**

Bank as a lessee

At the inception of a contract, the Bank assesses whether the contract is, or contains, a lease. A contract is or contains a lease if the contract conveys the right to control the use of an identified assets for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- The Bank has the right to obtain substantially all the economic benefits from use of the asset throughout the period of use; and
- The Bank has the right to direct the use of the asset. The Bank has this right when it has the decision-making rights that are the most relevant to changing how and for what purpose the asset is used are predetermined

1. The Bank has the right to operate the asset;
2. The Bank has designed the asset in a way that predetermined how and for what purpose it will be used.

At the inception or on re-assessment of a contract that contains a lease component, the Bank allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices and the aggregate stand-alone price of the non-lease components. However, for the leases of improvements in which the Bank is a lessee, the Bank has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

Upon lease commencement a lessee recognizes a right-of-use asset and a lease liability. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payment made at or before the commencement date, plus any initial direct cost incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset to the condition required by the terms and conditions of the lease, less any lease incentives received.

**o. Sewa (lanjutan)**

Bank sebagai penyewa (lanjutan)

Berdasarkan model biaya, aset hak-guna diukur pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi penurunan nilai. Jika sewa mengalihkan kepemilikan aset pendasar kepada Bank pada akhir masa sewa atau jika biaya perolehan aset hak-guna mencerminkan bahwa penyewa akan mengeksekusi opsi beli, Bank mendepresiasi hak-guna sejak tanggal permulaan hingga akhir umur manfaat aset pendasar. Jika tidak, Bank mendepresiasi aset hak-guna dari tanggal permulaan hingga tanggal yang lebih awal antara akhir umur manfaat aset hak-guna atau akhir masa sewa.

Liabilitas sewa pada awalnya diukur pada nilai kini dari pembayaran sewa yang terutang selama masa sewa, didiskontokan pada suku bunga implisit dalam sewa jika hal itu dapat segera ditentukan. Jika suku bunga implisit tersebut tidak dapat segera ditentukan, Bank menggunakan suku bunga pinjaman inkremental.

Pembayaran sewa yang termasuk dalam pengukuran liabilitas sewa terdiri dari:

- pembayaran tetap, termasuk pembayaran tetap secara-substansi dikurangi piutang insentif sewa;
- pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, awalnya diukur menggunakan indeks atau suku bunga pada tanggal permulaan;
- jumlah yang diperkirakan akan dibayarkan oleh Bank dalam jaminan nilai residual;
- harga eksekusi opsi beli yang cukup pasti Bank akan mengeksekusi; dan
- pembayaran penalti untuk penghentian sewa lebih awal kecuali Bank cukup pasti untuk tidak menghentikan kontrak lebih awal.

Pembayaran sewa variabel yang tidak termasuk dalam pengukuran liabilitas sewa diakui dalam laba rugi pada periode terjadinya peristiwa atau kondisi yang memicu terjadinya pembayaran, kecuali biaya tersebut dimasukkan dalam nilai tercatat aset lain menurut Pernyataan lain.

Liabilitas sewa selanjutnya diukur kembali untuk mencerminkan perubahan dalam:

- masa sewa (menggunakan tingkat diskonto yang direvisi);
- penilaian opsi beli (menggunakan tingkat diskonto yang direvisi);
- jumlah yang diperkirakan akan dibayarkan dalam jaminan nilai residual (menggunakan tingkat diskonto yang tidak berubah); atau
- pembayaran sewa masa depan sebagai akibat dari perubahan indeks atau suku bunga yang digunakan untuk menentukan pembayaran tersebut (menggunakan tingkat diskonto yang tidak berubah).

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**o. Leases (continued)**

Bank as a lessee (continued)

Under the cost model, a right-of-use asset is measured at cost less accumulated depreciation and accumulated impairment. If the lease transfers ownership of the underlying assets to the Bank at the end of the lease period or if the acquisition cost of the right-of-use asset reflects that the lessee will make a purchase option, the Bank depreciates the right-of-use asset from the commencement date until the end of the useful life of the asset underlying assets. If not, the Bank depreciates the right-of-use assets from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The lease liability is initially measured at the present value of the lease payments payable over the lease term, discounted at the rate implicit in the lease if that can be readily determined. If that rate cannot be readily determined, the Bank uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments less any lease incentive receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Bank under a residual value guarantee;
- the exercise price under a purchase option that the Bank is reasonably certain to exercise; and
- penalties payment for early termination of a lease unless the Bank is reasonably certain not to terminate early.

Variable lease payments that are not included in the measurement of the lease liability are recognized in profit or loss in the period in which the event or condition that triggers payment occurs, unless the costs are included in the carrying amount of another asset under another Standard.

The lease liability is subsequently remeasured to reflect changes in:

- the lease term (using a revised discount rate);
- the assessment of a purchase option (using a revised discount rate);
- the amounts expected to be payable under residual value guarantees (using an unchanged discount rate); or
- future lease payments resulting from a change in an index or a rate used to determine those payments (using an unchanged discount rate).

**o. Sewa (lanjutan)**

Bank sebagai penyewa (lanjutan)

Setelah tanggal permulaan, Bank mengukur aset hak-guna dengan menggunakan model biaya yang berkaitan aset tetap sesuai PSAK 216 (sebelumnya PSAK 16).

Berdasarkan model biaya, aset hak-guna diukur pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi penurunan nilai. Jika sewa mengalihkan kepemilikan aset pendasar kepada Bank pada akhir masa sewa atau jika biaya perolehan aset hak-guna mencerminkan bahwa penyewa akan mengeksekusi opsi beli, Bank mendepresiasi hak-guna sejak tanggal permulaan hingga akhir umur manfaat aset pendasar. Jika tidak, Bank mendepresiasi aset hak-guna dari tanggal permulaan hingga tanggal yang lebih awal antara akhir umur manfaat aset hak-guna atau akhir masa sewa.

Sewa jangka pendek

Bank memutuskan untuk tidak mengakui aset hak-guna dan liabilitas sewa untuk sewa jangka pendek yang memiliki masa sewa 12 bulan atau kurang. Bank mengakui pembayaran sewa atas sewa tersebut sebagai beban dengan dasar garis lurus selama masa sewa.

**p. Liabilitas Segera**

Liabilitas segera dicatat pada saat timbulnya liabilitas atau diterima perintah dari pemberi amanat, baik dari masyarakat maupun dari bank lain. Liabilitas segera disajikan sebesar biaya perolehan yang diamortisasi (Catatan 3d).

**q. Simpanan Nasabah**

Simpanan nasabah adalah dana yang dipercayakan oleh masyarakat (selain bank) kepada bank berdasarkan perjanjian penyimpanan dana. Termasuk dalam akun ini adalah giro, tabungan, deposito berjangka, sertifikat deposito, dan bentuk lain yang dapat dipersamakan dengan itu.

Pada saat pengakuan awal simpanan diukur sebesar nilai wajar dikurangi dengan biaya transaksi yang dapat diatribusikan secara langsung, dan selanjutnya diukur sebesar biaya perolehan yang diamortisasi menggunakan metode suku bunga efektif (Catatan 3d).

**3. INFORMATION ON MATERIAL ACCOUNTING POLICIES (continued)**

**o. Leases (continued)**

Bank as a lessee (continued)

After lease commencement, the Bank measures the right-of-use asset using a cost model that relates to fixed assets under PSAK 216 (formerly PSAK 16).

Under the cost model, a right-of-use asset is measured at cost less accumulated depreciation and accumulated impairment. If the lease transfers ownership of the underlying assets to the Bank at the end of the lease period or if the acquisition cost of the right-of-use asset reflects that the lessee will make a purchase option, the Bank depreciates the right-of-use asset from the commencement date until the end of the useful life of the asset underlying assets. If not, the Bank depreciates the right-of-use assets from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

Short-term leases

The Bank has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less. The Bank recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

**p. Liabilities Due Immediately**

Liabilities due immediately is recorded when it occurs or due to a direct order from the shareholder both public and other bank. Liabilities due immediately is stated at the amortized cost (Note 3d).

**q. Deposits from Customers**

Deposits from customers are the funds placed by customers (excluding banks) to the Bank based on fund deposit agreements. Included in this account are current accounts, saving deposits, time deposits, certificates of deposits and other forms which are similar.

At initial recognition deposits are measured at fair value net of transaction costs directly attributable to the deposits, and are measured subsequently at amortized costs using the effective interest rate method (Note 3d).

**r. Simpanan dari Bank Lain**

Simpanan dari bank lain terdiri dari liabilitas terhadap bank lain, baik lokal maupun luar negeri, dalam bentuk Giro dan deposito berjangka, sertifikat deposito.

Pada saat pengakuan awal simpanan diukur sebesar nilai wajar dikurangi dengan biaya transaksi yang dapat diatribusikan secara langsung, dan selanjutnya diukur sebesar biaya perolehan yang diamortisasi menggunakan suku bunga efektif (Catatan 3d).

**s. Cadangan Umum**

Menurut Undang-undang Perseroan Terbatas No. 40 tahun 2007, Bank wajib setiap tahun menyisihkan jumlah tertentu dari laba bersih untuk cadangan, sampai cadangan mencapai sekurang-kurangnya 20% dari modal yang ditempatkan. Penentuan jumlah penyisihan sebagaimana yang dimaksud akan ditentukan oleh rapat umum para pemegang saham.

**t. Pendapatan dan Beban Bunga**

Pendapatan dan beban bunga untuk semua instrumen keuangan yang dikenakan suku bunga diakui pada laporan laba rugi dengan menggunakan metode suku bunga efektif.

Pendapatan kredit yang mengalami penurunan nilai dihitung menggunakan suku bunga efektif atas dasar nilai kredit setelah memperhitungkan kerugian penurunan nilai.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari aset keuangan atau liabilitas keuangan (atau, jika lebih tepat, digunakan periode yang lebih singkat) untuk memperoleh nilai tercatat neto dari instrumen keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Bank mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, tetapi tidak mempertimbangkan kerugian kredit di masa mendatang. Perhitungan ini mencakup seluruh komisi, provisi, dan bentuk lain diterima oleh para pihak dalam kontrak yang merupakan bagian tidak terpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

**u. Pendapatan Provisi dan Komisi**

Pendapatan provisi dan komisi yang berkaitan langsung dengan kegiatan pinjaman di amortisasi sesuai dengan jangka waktu kontrak dengan menggunakan metode suku bunga efektif dan diklasifikasikan sebagai bagian dari pendapatan bunga pada laba rugi.

Pendapatan provisi dan komisi yang tidak berkaitan dengan kegiatan pemberian kredit diakui sebagai pendapatan pada saat terjadinya transaksi sebagai pendapatan operasional lainnya.

**r. Deposits from Other Banks**

Deposits from other banks consist of the liability to other banks, both domestic and overseas in the form of demand deposits and time deposits, certificate of deposits.

At initial recognition, deposits from other banks measured at fair value net of transaction costs which directly attributable to deposits are measured subsequently at amortized costs using interest rate (Note 3d).

**s. General Reserves**

According to Law No. 40, year 2007, the Bank has to provide a general reserves amounting to 20% of the issued and paid up capital. Determination of the reserved will be set in the shareholders general meeting.

**t. Interest Income and Expenses**

Interest income and expense for all interest-bearing financial instruments are recognized in the statement of profit or loss using the effective interest rate method.

Interest income from impaired loans are computed using the effective interest method based on the amount of loan, net of impairment loss.

The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial assets and financial liabilities (or, where appropriate, a shorter period) to the carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument but not future credit losses. **w. Income Tax (continued)**

Current Tax (continued)

The current tax payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the statement of profit or loss and other comprehensive income of the Bank because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable nor deductible. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Management periodically evaluates the amount reported in the Annual Tax Return ("SPT") in relation to the circumstances in which the applicable tax regulations are subject to interpretation and, if necessary, the management will calculate the provision that may arise.

Deferred Tax

Deferred tax is recognized using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences.

Deferred tax assets are recognized for all deductible temporary differences and carry forward of unused tax losses to the extent that it is probable that taxable profits will be available against which deductible temporary differences and the carry forward of unused tax losses can be utilized.

The carrying amount of a deferred tax asset is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the benefit of that deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted as at the reporting date.

Other Taxation Matters

Corrections to tax obligations are recorded when an assessment is received or, if appealed against, when the appeal has been decided.

**4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)**

**Pertimbangan, Estimasi dan Asumsi (lanjutan)**

Pertimbangan, estimasi dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Bank yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan:

**Menentukan Mata Uang Fungsional**

Mata uang fungsional adalah mata uang dari lingkungan ekonomi utama dimana Bank beroperasi. Manajemen mempertimbangkan mata uang yang paling memengaruhi pendapatan dan harga pokok penjualan dan indikator lainnya dalam menentukan mata uang yang paling sesuai mewakili dampak ekonomi yang mendasari transaksi, peristiwa dan kondisi.

**Menentukan Klasifikasi Aset Keuangan dan Liabilitas Keuangan**

Bank menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan definisi yang ditetapkan PSAK 109 (sebelumnya PSAK 71) dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Bank seperti diungkapkan pada Catatan 40 atas laporan keuangan.

**Menentukan Penurunan Nilai Aset Keuangan**

Sesuai dengan PSAK 109 (sebelumnya PSAK 71), pengukuran cadangan kerugian penurunan nilai aset keuangan yang diukur pada biaya perolehan diamortisasi dan diukur pada nilai wajar melalui penghasilan komprehensif lain membutuhkan penggunaan model yang kompleks dan asumsi signifikan terkait *future economic conditions* dan *credit behaviour*.

Estimasi signifikan dibutuhkan dalam menerapkan perhitungan cadangan kerugian penurunan nilai berdasarkan PSAK 109 (sebelumnya PSAK 71), antara lain:

- Penentuan kriteria *Significant Increase in Credit Risk*;
- Menentukan model yang tepat dan asumsi untuk perhitungan cadangan kerugian penurunan nilai;
- Menentukan jumlah dan pembebanan relatif atas skenario *forward-looking* untuk masing-masing segmen/produk;
- Menentukan segmentasi aset keuangan yang sejenis untuk perhitungan cadangan kerugian penurunan nilai;
- Estimasi arus kas debitur dalam perhitungan *individual impairment*.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**Judgments, Estimates and Assumptions (continued)**

The following judgments, estimates and assumptions made by management in implementing accounting policies of the Bank have the most significant effect on the amount recognized in the financial statements:

**Determining Functional Currency**

The functional currency is the currency of the primary economic environment in which the Bank operates. The management considers the currency that mainly influences the revenue and cost of sales and other indicators in determining the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

**Determining Classification of Financial Assets and Financial Liabilities**

The Bank determines classification of certain assets and liabilities as financial assets and financial liabilities by considering the definitions set forth in PSAK 109 (formerly PSAK 71) are met. Accordingly, financial assets and financial liabilities are recognized in accordance with the Bank's accounting policies as disclosed in the Note 40 to the financial statements.

**Determining Impairment of Financial Assets**

According to PSAK 109 (formerly PSAK 71), the measurement of the expected credit loss allowance for financial assets measured at amortized cost and at fair value through other comprehensive income is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour.

Significant estimates are required in applying the PSAK 109 (formerly PSAK 71) requirements for measuring allowance for impairment losses, such as:

- Determination of Criteria for Significant Increase in Credit Risk
- Choosing appropriate models and assumptions for the measurement of allowance for impairment losses;
- Establishing the number and relative weightings of forward-looking scenarios for each type of segment/product;
- Establishing the segments of similar financial assets for the purposes of measuring allowance for impairment losses;
- Estimate debtor's cash flow in the calculation of individual impairment.

**4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)**

**Pertimbangan, Estimasi dan Asumsi (lanjutan)**

**Menentukan Nilai Wajar dan Menghitung Amortisasi Biaya Perolehan dari Instrumen Keuangan**

Bank mencatat aset keuangan dan liabilitas keuangan tertentu pada nilai wajar dan pada biaya perolehan yang diamortisasi, yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas pengukuran nilai wajar dan asumsi yang digunakan dalam perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti obyektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Bank menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat memengaruhi secara langsung laba atau rugi Bank. Penjelasan lebih rinci diungkapkan dalam Catatan 40 atas laporan keuangan.

**Mengevaluasi Perjanjian Sewa**

Bank sebagai Penyewa - Menilai pengaturan sewa dan jangka waktu sewa

Penentuan apakah suatu perjanjian mengandung unsur sewa membutuhkan pertimbangan yang cermat untuk menilai apakah perjanjian tersebut memberikan hak untuk mendapatkan secara substansial seluruh manfaat ekonomi dari penggunaan aset identifikasian dan hak untuk mengarahkan penggunaan aset identifikasian, bahkan jika hak tersebut tidak dijabarkan secara eksplisit di perjanjian. Dalam menentukan jangka waktu sewa, Bank mempertimbangkan semua fakta dan keadaan yang menimbulkan insentif ekonomi untuk menggunakan opsi perpanjangan, atau tidak menggunakan opsi penghentian. Opsi perpanjangan (atau periode setelah opsi penghentian kontrak kerja) hanya termasuk dalam jangka waktu sewa jika cukup pasti akan diperpanjang (atau tidak dihentikan).

Bank sebagai Penyewa - Memperkirakan suku bunga pinjaman inkremental untuk liabilitas sewa

Karena Bank tidak dapat langsung menentukan suku bunga implisit, manajemen menggunakan suku bunga pinjaman inkremental Bank sebagai tingkat diskonto. Ada beberapa faktor yang perlu dipertimbangkan dalam menentukan suku bunga pinjaman inkremental, yang banyak di antaranya memerlukan pertimbangan untuk dapat secara andal mengukur penyesuaian yang diperlukan untuk mencapai tingkat diskonto akhir. Dalam menentukan suku bunga pinjaman inkremental, Bank mempertimbangkan faktor-faktor utama berikut: risiko kredit korporat Bank, jangka waktu sewa, jangka waktu pembayaran sewa, lingkungan ekonomi, waktu dimana sewa dimulai, dan mata uang dimana pembayaran sewa ditentukan.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**Judgments, Estimates and Assumptions (continued)**

**Determining Fair Value and Calculating of Cost Amortization of Financial Instruments**

The Bank records certain assets and financial liabilities at fair value and at amortized cost, which requires the use of accounting estimates. While significant components of fair value measurement and assumptions used in the calculation of cost amortization is determined using verifiable objective evidence, the amount of the fair value or amortized cost may differ if the Bank uses different valuation methodologies or assumptions. These changes directly affect the Bank's profit or loss. More detailed information is disclosed in Note 40 to the financial statements.

**Evaluating Lease Agreements**

Bank as Lessee - Assessing lease arrangement and lease term

Determining whether an arrangement is or contains a lease requires careful judgment to assess whether the arrangement conveys a right to obtain substantially all the economic benefits from use of the asset throughout the period of use and right to direct the use of the asset, even if the right is not explicitly specified in the arrangement. In determining the lease term, the Bank considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

Bank as Lessee - Estimating the incremental borrowing rate for lease liability

Since the Bank could not readily determine the implicit rate, management use the Bank's incremental borrowing rate as a discount rate. There are a number factors to consider in determining an incremental borrowing rate, many of which need judgment in order to be able to reliably quantify any necessary adjustments to arrive at the final discount rates. In determining incremental borrowing rate, the Bank considers the following main factors: the Bank's corporate credit risk, the lease term, the lease payment term, the economic environment, the time at which the lease is entered into, and the currency in which the lease payments are denominated.

**4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)**

**Pertimbangan, Estimasi dan Asumsi (lanjutan)**

**Menentukan Jumlah Terpulihkan dari Aset Nonkeuangan**

Penilaian penurunan untuk aset nonkeuangan dilakukan ketika indikator penurunan nilai tertentu yang hadir. Menentukan nilai wajar aset membutuhkan estimasi arus kas yang diharapkan akan dihasilkan dari penggunaan lanjutan dan disposisi akhir dari aset tersebut. Setiap perubahan signifikan dalam asumsi yang digunakan dalam menentukan nilai wajar material dapat memengaruhi penilaian nilai dipulihkan dan kerugian penurunan nilai yang dihasilkan bisa memiliki dampak material terhadap hasil usaha.

**Menentukan Metode Penyusutan dan Estimasi Masa Manfaat Aset Tetap**

Bank mengestimasi masa manfaat ekonomis aset tetap berdasarkan utilisasi dari aset yang diharapkan dan didukung dengan rencana dan strategi usaha dan perilaku pasar.

Estimasi dari masa manfaat aset tetap adalah berdasarkan penelaahan Bank terhadap praktek industri, evaluasi teknis internal dan pengalaman untuk aset yang setara.

Estimasi masa manfaat ditelaah minimal setiap akhir tahun pelaporan dan diperbarui jika ekspektasi berbeda dari estimasi sebelumnya dikarenakan pemakaian dan kerusakan fisik, keusangan secara teknis atau komersial dan hukum atau pembatasan lain atas penggunaan dari aset serta perkembangan teknologi.

Namun demikian, adalah mungkin, hasil di masa depan dari operasi dapat dipengaruhi secara material oleh perubahan-perubahan dalam estimasi yang diakibatkan oleh perubahan faktor-faktor yang disebutkan di atas, dan karenanya biaya penyusutan masa depan mungkin direvisi.

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara 3 sampai dengan 20 tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Bank menjalankan bisnisnya. Penjelasan lebih rinci diungkapkan dalam Catatan 15 atas laporan keuangan.

**Penurunan Nilai atas Aset Tetap dan Agunan yang Diambil Alih**

Bank melakukan penilaian atas penurunan nilai pada aset tetap, agunan yang diambil alih ("AYDA") dan aset yang tidak digunakan pada saat terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat pada suatu aset tidak dapat dipulihkan.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**Judgments, Estimates and Assumptions (continued)**

**Determining Recoverable Amount of Non-financial Assets**

Impairment review for non-financial assets is performed when certain impairment indicators are present. Determining the fair value of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. Any significant changes in the assumptions used in determining the fair value may materially affect the assessment of recoverable values and any resulting impairment loss could have a material impact on results of operations.

**Determining Depreciation Method and Estimated Useful Lives of Fixed Assets**

The Bank estimates the useful lives of fixed assets based on the expected utilization of assets and supported by plans and business strategy and market behavior.

Estimation of useful lives of fixed assets are provided based on the Bank's evaluation on industry practice, internal technical evaluation and experience for assets equivalent.

The estimated useful lives are reviewed at least at each year end reporting and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other restrictions on the use of assets as well as technological developments.

However, it is possible, future results of operations could be materially affected by changes in the estimates due to changes in the factors mentioned above, and therefore the future depreciation charges may be revised.

The costs of fixed assets are depreciated using the straight-line method over the estimated economic useful lives. Management estimates the useful lives of fixed assets between 3 to 20 years. This is the age that is generally expected in the industry in which the Bank does business. More detailed information disclosed in the Note 15 to the financial statements.

**Impairment of Fixed Assets and Foreclosed Assets**

The Bank assesses impairment on fixed assets, foreclosed assets and abandoned properties whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

**4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)**

**Pertimbangan, Estimasi dan Asumsi (lanjutan)**

**Penurunan Nilai atas Aset Tetap dan Agunan yang Diambil Alih (lanjutan)**

Faktor-faktor yang dianggap penting oleh Bank yang dapat memicu adanya penelaahan atas penurunan nilai termasuk sebagai berikut:

- kinerja yang rendah secara signifikan yang relatif terhadap ekspektasi dari hasil operasi historis maupun proyeksi hasil operasi di masa yang akan datang;
- perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- tren industri ekonomi yang secara signifikan bernilai negatif.

Manajemen berkeyakinan bahwa tidak ada kejadian atau perubahan keadaan yang bisa menimbulkan indikasi penurunan pada nilai aset tetap dan aset yang tidak digunakan, sedangkan jumlah cadangan penurunan nilai agunan yang diambil alih telah diungkapkan pada Catatan 17 atas laporan keuangan.

**Menentukan Pajak Penghasilan**

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Bank mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan.

Dalam situasi tertentu, Bank tidak dapat menentukan secara pasti jumlah liabilitas pajak mereka pada saat ini atau masa depan karena proses pemeriksaan, atau negosiasi dengan otoritas perpajakan. Ketidakpastian timbul terkait dengan interpretasi dari peraturan perpajakan yang kompleks serta jumlah dan waktu dari penghasilan kena pajak di masa depan.

Bank menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi nilai tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan. Bank juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai. Penjelasan lebih rinci diungkapkan dalam Catatan 21 atas laporan keuangan.

Bank menentukan provisi perpajakan berdasarkan estimasi atas kemungkinan adanya tambahan beban pajak. Jika hasil akhir dari hal ini berbeda dengan jumlah yang dicatat semula, maka perbedaan tersebut akan berdampak terhadap laba/rugi.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**Judgments, Estimates and Assumptions (continued)**

**Impairment of Fixed Assets and Foreclosed Assets (continued)**

The factors that the Bank considers important which could trigger an impairment review include the following:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- significant negative industry or economic trends.

Management believes that there are no events or changes in the circumstances that may raise indications of impairment on the value of the fixed assets and abandoned properties, while the allowance for decline in value on foreclosed assets has been disclosed in Note 17 to the financial statements.

**Determining Income Tax**

Significant judgments made in determining the provision for income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business activities. The Bank recognizes a liability for corporate income tax based on estimates of whether there will be an additional income tax.

In certain situations, the Bank cannot determine the exact amount of their current or future tax liability due to on going investigation, or the negotiations with tax authorities. Uncertainties arise concerning the interpretation of complex tax regulations and the amount and timing of the taxable income in the future.

The Bank reviews the deferred tax assets at each reporting date and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable income will be available to allow for part or all of the deferred tax assets to be utilized. The Bank also reviews the expected timing and tax rates on the reversal of temporary differences and adjusts the impact of deferred tax accordingly. More detailed information is disclosed in Note 21 to the financial statements.

The Bank provides for tax provision based on estimates whether the additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the profit/loss.

**4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)**

**Pertimbangan, Estimasi dan Asumsi (lanjutan)**

**Estimasi Beban Pensiun dan Imbalan Kerja**

Penentuan liabilitas atas pensiun dan kewajiban imbalan kerja Bank bergantung pada pemilihan asumsi yang digunakan oleh aktuaris independen dalam menghitung jumlah-jumlah tersebut.

Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat pengunduran diri karyawan tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian.

Sementara Bank berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Bank dapat memengaruhi secara material liabilitas diestimasi atas pensiun dan imbalan kerja dan beban imbalan kerja neto. Penjelasan lebih rinci diungkapkan dalam Catatan 22 atas laporan keuangan.

**4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)**

**Judgments, Estimates and Assumptions (continued)**

**Estimated Pension Costs and Employee Benefits**

The determination of liability for pension and employee benefits obligation and net employee benefits expense is subject to the selection of certain assumptions used by independent actuaries in calculating such amounts.

The assumptions include, among others, the discount rate, the rate of annual salary increases, annual employee resignation rate, degree of disability, retirement age and mortality.

While the Bank believes that the assumptions are reasonable and appropriate, significant differences in actual results or significant changes in assumptions defined by the Bank can materially affect the estimated liability for employee benefits and pensions and net employee benefits expense. More detailed information disclosed in the Note 22 to the financial statements.

|                                                                                                                             | 2024                  |

Saham-saham preferen yang diterbitkan oleh PT Bank SBI Indonesia ("Bank") kepada Hana Bank diklasifikasikan dalam liabilitas lain-lain dalam laporan keuangan karena adanya hak dalam bentuk opsi jual yang memberikan pemegangnya, yaitu Hana Bank, hak untuk menjual saham yang dimilikinya, dengan kewajiban bagi State Bank of India sebagai pemegang saham mayoritas dari Bank untuk membeli saham opsi jual tersebut jika Hana Bank melaksanakan opsi jual tersebut dan pembeli tidak ditemukan dalam batas waktu yang tercantum dalam pemberitahuan terkait.

Pengklasifikasian ke dalam liabilitas lain-lain tersebut juga disebabkan oleh keadaan bahwa dividen yang menjadi hak Hana Bank bersifat kumulatif (dan dapat ditangguhkan jika Bank mengalami kerugian), yang akan mengurangi porsi dividen yang berhak diterima oleh State Bank of India dalam keadaan normal.

Pengklasifikasian ke dalam liabilitas lain-lain tersebut tidak dengan cara apa pun memengaruhi atau membatasi Bank dalam mendistribusikan dividen sesuai dengan keputusan Rapat Umum Pemegang Sahamnya.

Status pencatatan di OJK mengenai tidak dapat dicatatkannya saham-saham preferen tersebut sebagai bagian dari modal disetor diberikan pada Catatan 26.

**25. OTHER LIABILITIES (continued)**

Rent expenses in relation with above mentioned premises are charged to depreciation of rights-of-use assets and interest expense amounted to Rp5,273,238,027 and Rp1,028,393,188 for the year ended December 31, 2024, along Rp4,850,358,902 and Rp651,001,271, respectively, for the year ended December 31, 2023.

Advance in share capital (Note 26)

On September 11, 2024, the Bank received a capital deposit fund from PT KEB Hana Indonesia ("Hana Bank") for the purchase of preference shares as follows:

|  | 2023 |                                                                                                                |

|  | -    | <b>Initial purchase price</b>                                                                                  |

Preferred shares issued by PT Bank SBI Indonesia (the "Bank") to Hana Bank are classified under other liabilities in the financial statements due to the existence of right in the form of a put option that gives the holder, being Hana Bank, the right to sell the shares that it owns, with an obligation for State Bank of India as the majority shareholder of the Bank to purchase the put option shares if Hana Bank exercises the put option and a buyer is not found within the deadline in the related notice.

The classification into other liabilities is also due to the fact that dividends to which Hana Bank is entitled are cumulative in nature (and can be deferred if the Bank suffers a loss), which will dilute the portion of dividends that State Bank of India is entitled to receive in normal course.

The classification into other liabilities does not in any way affect or limit the Bank in distributing dividends in accordance with the decisions of its General Meeting of Shareholders.

The registration status with OJK regarding the non-recordability of such preferred shares as part of paid-up capital is given in Note 26.

**39. MANAJEMEN RISIKO (lanjutan)**

**Risiko Likuiditas**

Pengelolaan risiko likuiditas terkait dengan kemampuan Bank untuk memenuhi kebutuhan dana pada kewajiban maupun komitmennya ketika jatuh tempo. Pelaksanaan operasional likuiditas dilakukan oleh unit kerja treasuri dengan koordinasi unit-unit kerja lain yang terkait.

Permasalahan likuiditas di Bank pada umumnya relatif sama dengan permasalahan likuiditas bank-bank lainnya di Indonesia seperti memiliki risiko ketidakcocokan saat jatuh tempo (*mismatch*) dari sisi likuiditas, karena sebagian besar liabilitas bersifat jangka pendek sedangkan asetnya memiliki tenor yang lebih panjang. Sehubungan dengan itu, Bank telah melakukan evaluasi dan menelaah struktur laporan posisi keuangan serta mengambil sikap konservatif dalam menganalisis dan mengukur likuiditas.

- (i) Analisis likuiditas (waktu jatuh tempo) terhadap aset dan liabilitas keuangan pada tanggal 31 Desember 2024 dan 2023 adalah sebagai berikut:

(i) Analisis instrumen keuangan berdasarkan sisa jatuh tempo kontraktual:

(i) Analysis of financial instruments by remaining contractual maturities:

**Liabilitas keuangan**

**Financial liabilities**

Pengelompokan jatuh tempo yang relevan berdasarkan sisa periode saat tanggal laporan posisi keuangan sampai dengan tanggal jatuh tempo kontraktual. Ketika *counterparty* memiliki pilihan untuk menentukan waktu pembayaran, liabilitas dialokasikan ke periode yang lebih cepat dimana Bank dapat diminta untuk melakukan pembayaran.

The relevant maturity grouping is based on the remaining period at the financial position date to the contractual maturity date. When counterparty has a choice of when the amount is paid, the liability is allocated to the earliest period where the Bank can be required to pay.

Tabel dibawah ini merangkum profil jatuh tempo liabilitas keuangan Bank pada tanggal 31 Desember 2024 dan 2023 berdasarkan pada pembayaran kontraktual yang tidak terdiskonto:

The table below summarizes the maturity profile of the Bank's financial liabilities as of December 31, 2024 and 2023 based on undiscounted contractual payments:

**Risiko Pasar**

Risiko pasar adalah risiko dimana nilai wajar atau arus kas masa depan dari instrumen keuangan akan berfluktuasi karena perubahan dalam faktor dalam pasar, seperti tingkat suku bunga dan nilai tukar.

- Faktor risiko nilai tukar yang terkait dengan potensi kerugian akibat pergerakan/perubahan nilai tukar.
- Faktor risiko tingkat bunga terkait dengan pergerakan tingkat bunga yang tidak sejalan dengan posisi repricing gap antara aset dan liabilitas Bank.

Langkah-langkah manajemen terhadap risiko pasar antara lain:

- Melakukan pengawasan dan proyeksi secara intensif terhadap perkembangan suku bunga yang terjadi di pasar, sehingga penyesuaian suku bunga baik dari segi pendanaan maupun dalam penggunaan dana dapat segera dilakukan.
- Memonitor volatilitas bunga dalam rangka menghitung risiko keuangan sehubungan dengan adanya perbedaan jatuh tempo dari struktur aset dan liabilitas.
- Diversifikasi produk-produk aset dan liabilitas dalam rangka meminimalisir dampak perubahan suku bunga yang beresolusi, sehingga net interest margin tetap dapat tercapai secara optimal.

**Liquidity Risk (continued)**

- (i) Analysis of financial instruments by remaining contractual maturities: (continued)

The table below shows the contractual expiry by maturity of the Bank's commitments and contingent liabilities as of December 31, 2024 and 2023:

**Market Risk**

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market factors, such as interest rates and foreign exchange rates.

- Foreign exchange rate risk is associated with potential losses due to movement/changes in exchange rates.
- Interest rate risk is associated with interest rate movements that are inconsistent with the position of repricing gap between assets and liabilities of the Bank.

The steps to market risk management includes:

- Conduct intensive monitoring and projections on changing rates in the market, so that adjustment of interest rates both in terms of funding and the use of funds can be immediately performed.
- Monitor the volatility of interest rates in order to calculate the financial risks associated with the maturity gap of asset and liability structure.
- Diversify assets and liabilities products in order to minimize the impact of changes in interest rates fluctuation, so that the net interest margin remains to be achieved optimally.

Metode dan asumsi yang digunakan oleh Bank dalam mengestimasi nilai wajar dari instrumen keuangan adalah sebagai berikut:

- Nilai tercatat dari kas dan setara kas, giro pada Bank Indonesia adalah perkiraan yang layak atas nilai wajar.
- Nilai tercatat penempatan pada Bank Indonesia dan bank lain dengan suku bunga tetap, efek-efek yang dibeli dengan janji dijual kembali, tagihan dan liabilitas akseptasi, piutang bunga dan aset lain-lain adalah perkiraan yang layak atas nilai wajarnya karena sisa jatuh tempo di bawah satu tahun.
- Nilai tercatat dari kredit yang diberikan dengan suku bunga mengambang dan nilai tercatat atas kredit jangka pendek dengan suku bunga tetap adalah perkiraan yang layak atas nilai wajar. Estimasi nilai wajar dengan suku bunga tetap berdasarkan model diskonto arus kas menggunakan kurva yield terkini yang tepat sesuai dengan sisa periode jatuh temponya.
- Estimasi nilai wajar liabilitas segera, simpanan tanpa jatuh tempo, termasuk simpanan tanpa bunga dan utang bunga adalah sebesar jumlah yang harus dibayarkan kembali sewaktu-waktu.
- Estimasi nilai wajar terhadap simpanan dengan tingkat suku bunga tetap ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa. Karena sisa jatuh tempo di bawah satu tahun sehingga nilai tercatat dari simpanan dengan suku bunga tetap dan liabilitas lain-lain adalah perkiraan yang layak atas nilai wajar.
- Nilai wajar untuk biaya perolehan yang diamortisasi dan nilai wajar yang diukur melalui penghasilan komprehensif lain ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan yield yang serupa atau dinilai dengan menggunakan metode penilaian internal.

**40. FINANCIAL INSTRUMENTS (continued)**

The methods and assumptions used by the Bank in estimating the fair value of the financial instruments are as follows:

- The carrying amount of cash and cash equivalents, current accounts with Bank Indonesia is a reasonable approximation of their fair value.
- The carrying amounts of placements with Bank Indonesia and other banks, securities purchased under resale agreements, acceptance receivables and payables, interest receivables and other assets were the reasonable approximation of their fair values since the maturity is below one year.
- The carrying amounts of floating rate loans and short-term fixed rate loans were the reasonable approximation of their fair values. The estimated fair value of loans are based on discounted cash flow method using current yield curve appropriate for the remaining term of maturity.
- The estimated fair values of liabilities due immediately, deposits with no stated maturity, which include non-interest bearing deposits and interest payables are the amounts repayable on demand.
- The estimated fair values of interest-bearing deposits are based on discounted cash flows using interest rates for new debts with similar remaining maturity. Since the maturity is below one year, the carrying amounts of deposits and other liabilities were the reasonable approximation of their fair values.
- The fair values of amortized cost and fair value through other comprehensive income securities are based on the market prices or broker/dealer price quotations. When this information is not available, the fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics or using internal valuation model.
