Example for evaluation of proposals:

The example to calculate most successful bidder based on marks given on each of the above parameters is as follows:

Total marks 100.

Three premises shortlisted-A,B,& C. They get following marks

A-78; B-70; C-54

Convert them to percentiles A : $(78/78)*100= 100$

B : $(70/78)*100 =89.74$ C : $(54/78)*100=69.23$

Now that technical bids are evaluated, financial bids can be opened. Financial quotes for three premises are as

follows:

A : Rs 70 per sqm for Built up area

B:Rs 60 per sqm for Built up area C : Rs 50 per sqm for Built up area

As C is lowest, to work out percentile score, following will be the calculation:

C: $(50/50)*100=100$ B: $(50/ 60) *100 = 83.33$

A: $(50/ 70) *100 = 71.43$

Since proportion of technical to financial score is specified to be 70:30,then final scores will work out as follows:

A: $(100 \times 0.70) + (71.43 \times 0.30) = 91.43$

B: $(89.74 \times 0.70) + (83.33 \times 0.30) = 87.82$

C: $(69.23 \times 0.70) + (100 \times 0.30) = 78.46$

Therefore, most successful bidder shall be A and Bank may invite A for further negotiation.
